Tissue Plasminogen Activator (t-PA) Considered

This measure is to be reported for all patients aged 18 years and older undergoing active treatment for ischemic stroke for **each** hospital stay during the reporting period.

Measure description

Percentage of patients aged 18 years and older with a diagnosis of ischemic stroke whose time from symptom onset to arrival is less than 3 hours who were considered for t-PA administration

What will you need to report for each hospital stay for patients with stroke for this measure?

If you select this measure for reporting, you will report:

- The time of ischemic stroke symptom onset for each patient with a diagnosis of ischemic stroke:
 - Onset of less than three hours prior to arrival
 - Onset greater than or equal to 3 hours prior to arrival

If the time from symptom onset to arrival is less than three hours, you will then need to report:

■ Whether or not you considered administration of t-PA for the patient (includes patients to whom t-PA was given or patients for whom reasons for not being a candidate for t-PA therapy are documented)

What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or non-physician provider to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients, there are no allowable performance exclusions.

Tissue Plasminogen Activator (t-PA) Considered

PQRI Data Collection Sheet			
			/ / □ Male □ Femal
atient's Name Practice Medical Record Nu	Practice Medical Record Number (MRN)		Birth Date (mm/dd/yyyy) Gender
lational Provider Identifier (NPI)			Date of Service
Clinical Information			Billing Information
Step 1 Is patient eligible for this measure?			
	Yes	No	Code Required on Claim Form
Patient is aged 18 years and older.			Verify date of birth on claim form.
Patient has a diagnosis of ischemic stroke.			Refer to coding specifications document for list of applicable codes.
There is a CPT E/M Service Code for this visit.			
If \mathbf{No} is checked for any of the above, STOP. Do not report CPT category II code.	ort a		
Step 2 Does patient also have the other requ this measure?	iirements	s for	
	Yes	No	Code to be Reported on Line 24D of Paper Claim Form (or Service Line 24 of Electronic Claim Form)
Is the time of symptom onset less than 3 hours prior to arrival?			If No (ie, symptom onset \geq 3 hours prior to arrival at hospital), report only 1066F and STOP.
			If Yes (ie, symptom onset < 3 hours prior to arrival at hospital), report 1065F and proceed to Step 3.
Step 3 Does patient meet the measure?			
Tissue Plasminogen Activator Administration (t-PA)	Yes	No	Code to be Reported on Line 24D of Paper Claim Form, if <i>Yes</i> (or Service Line 24 of Electronic Claim Form)
Considered (includes patients to whom t-PA was given or patients for whom reasons for not being a candidate for t-PA therapy are documented)			4077F
			If No is checked for the above, report 4077F–8P (t-PA administration was not considered, reason not otherwise specified.)

Coding Specifications

Codes required to document patient has ischemic stroke and a visit occurred:

An ICD-9 diagnosis code for ischemic stroke and a CPT E/M service code are required to identify patients to be included in this measure.

Ischemic stroke ICD-9 diagnosis codes

- **433.01**, 433.11, 433.21, 433.31, 433.81, 433.91 (occlusion and stenosis of cerebral arteries)
- 434.01, 434.11, 434.91, (occlusion of cerebral arteries)

AND

CPT E/M service codes

- 99221, 99222, 99223 (initial inpatient)
- 99251, 99252, 99253, 99254, 99255 (initial inpatient consultations)
- 99291 (critical care services)

Quality codes for this measure (at least one of the following for every eligible patient):

CPT II Code descriptors

(Data collection sheet should be used to determine appropriate combination of codes.)

- *CPT II 1065F:* Ischemic stroke symptom onset of less than 3 hours prior to arrival
- *CPT II 1066F:* Ischemic stroke symptom onset greater than or equal to 3 hours prior to arrival
- *CPT II 4077F:* Documentation that tissue plasminogen activator (t-PA) administration was considered
- *CPT II 4077F–8P*: Tissue plasminogen activator (t-PA) administration was not considered, reason not otherwise specified
