

Plan for Chemotherapy Documented Before Chemotherapy Administered

This measure is to be reported once per chemotherapy regimen received for each cancer patient who is administered chemotherapy during the reporting period.

Measure description

Percentage of cancer patients for whom a plan for the amount of chemotherapy to be given was documented before the chemotherapy was administered

What will you need to report for each patient with cancer who is administered chemotherapy for this measure?

If you select this measure for reporting, you will report:

- Whether or not a chemotherapy plan is documented prior to chemotherapy administration

What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or non-physician provider to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients who are administered chemotherapy, there are no allowable performance exclusions.
