## **Carotid Imaging Reports**

## **PQRI Data Collection Sheet**

			/ / 🗆 Mal	e 🗆 Female	
Patient's Name Practice Medical Record Number (MRN)		Birth Date (mm/dd/yyyy) Gender			
National Provider Identifier (NPI)			Date of Service		
Clinical Information			Billing Information		
Step 1 Is patient eligible for this measure?					
	Yes	No	Code Required on Claim Form		
Patient is aged 18 years and older.			Verify date of birth on claim form.		
Patient has a diagnosis of ischemic stroke or transient ischemic attack.			Refer to coding specifications document for list of applicable codes.		
There is a CPT Procedure Code for carotid imaging.					
If <b>No</b> is checked for any of the above, STOP. Do not report a CPT category II code.					
Step 2 Does patient meet or have an acceptable reason for not meeting the measure?					
Direct or Indirect Reference to Measurements of Distal Internal Carotid Diameter as Denominator for Stenosis Measurement <sup>1</sup>	Yes	No	Code to be Reported on Line 24D of Paper if <i>Yes</i> (or Service Line 24 of Electronic Cl		
Included			3100F		
Not included for the following reason:					
<ul> <li>Medical (eg, not indicated, contraindicated, other medical reason)</li> </ul>			3100F-1P		
Document reason here and in medical chart.			If <b>No</b> is checked for <b>all</b> of the above, report 3100F–8P (Carotid image study did not include direct or indirect reference to measurements of distal internal carotid diameter as the denominator for stenosis measurement, reason not othewise secified.)		

<sup>1</sup>"Direct or indirect reference to measurements of distal internal carotid diameter as the denominator for stenosis measurement" includes direct angiographic stenosis calculations based on the distal lumen as the denominator for stenosis measurement OR an equivalent validated method referenced to the above method (eg, for duplex ultrasound studies, velocity parameters that correlate the *residual* internal carotid lumen with methods based on the internal carotid lumen).
