

### Exposure Time Reported for Procedures Using Fluoroscopy

---

*This measure is to be reported **each time** a procedure using fluoroscopy is performed for all patients, regardless of age, in a hospital or outpatient setting during the reporting period. It is anticipated that clinicians providing the services for procedures using fluoroscopy will submit this measure.*

#### Measure description

Percentage of final reports for procedures using fluoroscopy that include documentation of radiation exposure or exposure time

#### What will you need to report for each patient undergoing a procedure using fluoroscopy for this measure?

If you select this measure for reporting, you will report:

- Whether or not you documented the radiation exposure or exposure time

#### What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or eligible health professional to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients, there are no allowable performance exclusions.
