

### Consideration of Rehabilitation Services

---

*This measure is to be reported **for all** patients aged 18 years and older undergoing active treatment for ischemic stroke or intracranial hemorrhage for **each** hospital stay during the reporting period. It is anticipated that clinicians who care for patients with a diagnosis of ischemic stroke or intracranial hemorrhage in the hospital setting will submit this measure.*

#### Measure description

Percentage of patients aged 18 years and older with a diagnosis of ischemic stroke or intracranial hemorrhage for whom consideration of rehabilitation services is documented

#### What will you need to report for each hospital stay for patients under active treatment for ischemic stroke or intracranial hemorrhage for this measure?

If you select this measure for reporting, you will report:

- Whether or not you considered<sup>1</sup> rehabilitation services at or prior to discharge

#### What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or eligible health professional to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients, there are no allowable performance exclusions.

---

<sup>1</sup>For purposes of this measure, “consideration of rehabilitation services” includes an order for rehabilitation services or documentation that rehabilitation services were not indicated.
