

### Suicide Risk Assessment

---

*This measure is to be reported at **each visit** during the reporting period for all patients aged 18 years and older with MDD.*

#### Measure description

Percentage of patients aged 18 years and older with a new diagnosis or recurrent episode of MDD who had a suicide risk assessment completed at each visit during the measurement period

#### What will you need to report for each visit for patients with MDD for this measure?

If you select this measure for reporting, you will report:

- Whether or not you assessed for suicide risk

#### What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or eligible health professional to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients, there are no allowable performance exclusions.
