

Exposure Time Reported for Procedures Using Fluoroscopy

*This measure is to be reported **each time** a procedure using fluoroscopy is performed for all patients, regardless of age, in a hospital or outpatient setting during the reporting period.*

Measure description

Percentage of final reports for procedures using fluoroscopy that include documentation of radiation exposure or exposure time

What will you need to report for each patient undergoing a procedure using fluoroscopy for this measure?

If you select this measure for reporting, you will report:

- Whether or not you documented the radiation exposure or exposure time

What if this process or outcome of care is not appropriate for your patient?

Some measures provide an opportunity for the physician or eligible health professional to document when a process or outcome of care is not appropriate for a given patient (also called performance exclusions). Because this measure is applicable to most if not all patients, there are no allowable performance exclusions.
