Introduction:

This document contains general implementation guidance for reporting 2016 Physician Quality Reporting System (PQRS) measures groups. Measures groups include reporting on a group of clinically-related measures identified by CMS for use in PQRS through a registry-based submission process. Twenty-five measures groups have been established for 2016 PQRS: Diabetes, Chronic Kidney Disease (CKD), Preventive Care, Coronary Artery Bypass Graft (CABG), Rheumatoid Arthritis (RA), Hepatitis C, Heart Failure (HF), Coronary Artery Disease (CAD), HIV/AIDS, Asthma, Chronic Obstructive Pulmonary Disease (COPD), Inflammatory Bowel Disease (IBD), Sleep Apnea, Dementia, Parkinson's Disease, Cataracts, Oncology, Total Knee Replacement (TKR), General Surgery, Optimizing Patient Exposure to Ionizing Radiation (OPEIR), Sinusitis, Acute Otitis Externa (AOE), Cardiovascular Prevention, Diabetic Retinopathy, and Multiple Chronic Conditions.

This document provides strategies and information to facilitate satisfactory reporting by each eligible professional who wishes to pursue this alternative.

Measures groups reporting is not available as a group practice reporting option (GPRO).

The *2016 Physician Quality Reporting System (PQRS) Measures Groups Specifications Manual* contains detailed descriptions for each quality measure within each measures group. Denominator coding has been modified from the original individual measure as specified by the measure developer to allow for implementation as a measures group. To get started, review the *2016 Physician Quality Reporting System (PQRS) Measures Groups Specifications Manual* to determine if a particular measures group is applicable to the Medicare services the eligible professional provides. The *2016 PQRS Measures Groups Specifications Manual* can be found at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>.

Note: Additional information on how to avoid future PQRS payment adjustments can be found through supporting documentation on the CMS website at [Physician Quality Reporting System Information](#).

Participants of programs that allow for PQRS credit, such as the Medicare Shared Savings Program (MSSP) or the Comprehensive Primary Care Initiative (CPCI) should refer to their respective program's guidance on PQRS.

Measures Groups Participation Strategy:

1. Plan and implement processes within the practice to ensure satisfactory reporting of measures groups.
2. Become familiar with the registry-based submission method for satisfactory reporting of measures groups:
20 Patient Sample Method via registry – a 12-month reporting period from January 1 to December 31
 - A participating eligible professional must report on all applicable measures within the selected measures group for a minimum sample of 20 unique patients (or procedures as applicable), a majority (11) of which must be Medicare Part B FFS patients, who meet patient sample criteria for the measures group. If the eligible professional does not have at least 20 unique patients (procedures) who meet patient sample criteria for the measures group, the eligible professional will need to choose another measures group or choose another reporting option. Please refer to the *2016 Physician Quality Reporting System (PQRS) Participation Decision Tree* located in the *2016 PQRS Implementation Guide*.
 - All applicable measures within the group must be reported at least once for each patient (procedure) within the sample population seen by the eligible professional during the reporting period (January 1 through December 31, 2016) for each of the 20 unique patients in which a majority are Medicare Part B FFS patients.
 - Measures groups containing a measure with a 0% performance rate will not be counted as satisfactorily reporting the measures group unless the measure is an inverse measure in which case a 0% would be considered satisfactorily reporting. An inverse measure with a 100% performance rate will not be counted as satisfactorily reporting the measures group.
 - See the measures groups flows and algorithms to better understand the calculation for satisfactory reporting. The measures group flows are included in the zip file titled *2016 PQRS Measures Groups Flows and Flow Manual*. This zip file also includes a measures group flow manual to assist in interpreting the measures group flows and can be accessed at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>.

Note: The *2016 PQRS Measures Group Specifications* manual includes ICD-10-CM diagnosis codes and CPT Patient Encounter codes. These codes are used to determine denominator eligibility (the common denominator) for a specific measures group.

4. Report all applicable measures for the measure group on each denominator-eligible patient included in the patient sample for each individual eligible professional. Report the appropriate numerator option as instructed in the *2016 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual on all applicable measures within the measures group for each patient included in the sample population for each individual eligible professional. Only one instance of reporting for each patient (procedure) included in the sample population will be used in PQRS analysis to calculate reporting and performance rates for each measure within a group.

The composite Quality Data Code (QDC) has been maintained for use by registries that utilize claims data. However, it is not necessary to submit this composite QDC for registry-based submissions. Refer to the *2016 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual for detailed instructions about how to report the numerator options for each of the measures groups at [Physician Quality Reporting System \(PQRS\) Measures Groups Specifications Manual](#).

An eligible professional is only required to report numerator options on those individual measures in the measures group that meet the criteria (e.g., age, gender, etc.) according to the *2016 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual. For example, if an eligible professional is reporting the Preventive Care Measures Group for a 52-year old female patient, only 7 measures out of 10 apply. See the Preventive Measures Group Demographic Criteria table below.

Table 2 - Preventive Care Measures Group Demographic Criteria
