Other Service Providers	184
Residential Treatment Facilities	185
Respite Care Facility	187
Suppliers	188
Transportation Services	194

Introduction

The Health Care Provider Taxonomy code set is an external, nonmedical data code set designed for use in an electronic environment, specifically within the ASC X12N Health Care transactions. This includes the transactions mandated under HIPAA.

The taxonomy code is a unique alphanumeric code, ten characters in length. The code set is structured into three distinct "Levels" including Provider Grouping, Classification, and Area of Specialization.

Level I, Provider Grouping

A major grouping of service(s) or occupation(s) of health care providers. For example: Allopathic & Osteopathic Physicians, Dental Providers, Hospitals, etc.

Level II, Classification

A more specific service or occupation related to the Provider Grouping. For example, the Classification for Allopathic & Osteopathic Physicians is based upon the General Specialty Certificates as issued by the appropriate national boards. The following boards will however, have their general certificates appear as Level III areas of specialization strictly due to display limitations of the code set for Boards that have multiple general certificates: Medical Genetics, Preventive Medicine, Psychiatry & Neurology, Radiology, Surgery, Otolaryngology, Pathology.

Level III, Area of Specialization

A more specialized area of the Classification in which a provider chooses to practice or make services available. For example, the Area of Specialization for provider grouping Allopathic & Osteopathic Physicians is based upon the Subspecialty Certificates as issued by the appropriate national boards.

The code set Levels are organized to allow for drilling down to the provider's most specific level of specialization. The ten digit codes for each provider category are unique and contain no embedded logic. The codes and categories are to be used exactly as they are assigned in the taxonomy list. At no time should codes be separated to form new codes, parsed apart, or edited on any one position within the code.

The taxonomy codes are self-selected by the provider. The taxonomy codes are organized based on education and training and are used to define specialty, not specific services that are rendered. Selection of a taxonomy code does not replace any credentialing or validation process that the organization requesting the code should complete. Definitions for some of the codes reference specialty or certifying boards as a source, but this reference in no way implies that providers have met the requirements of that board if they choose the code to identify themselves.

The code set is published (released) twice a year in January and July. The January publication is effective for use on April 1st and the July publication is effective for use on October 1st. The time between the publication release and the effective date is considered an implementation period to allow providers, payers, and vendors an opportunity to incorporate any changes into their systems.

Historical Background

In the absence of an all-encompassing Provider Classification System, both ASC X12N and the National Provider System Workgroup from the Centers for Medicare & Medicaid Services (CMS) began work on identifying and coding an external provider code set that would be able to codify provider grouping and provider area of specialization for all health care related providers. CMS' intent was to provide a single coding structure to support work on the National Provider System, while X12N needed a single common code set for trading partner use. The two projects worked independently to some extent until April 1996

when the lists were coordinated and a single taxonomy code set was proposed. A sub-group of X12N TG2 WG15 (Provider Information Work Group) was charged with resolving differences in the two proposed taxonomy code sets. Their work resulted in a single taxonomy code set that both CMS and members of X12N found meaningful, easy to use, and functional for electronic transactions.

The sub-group initially started with the CMS draft taxonomy code set. This list incorporated all types of providers associated with health care in various ways, e.g. technologists or technicians who support or repair equipment/machinery, contractors, physicians, dentists, suppliers. A number of the providers offer health services, in concert with others, and do not or cannot bill independently for their services. The amount of research to validate and classify all providers using the proposed hierarchical structure was enormous. The X12N sub-group focused on health care providers who are licensed practitioners, those who bill for health-related services rendered, and those who appeared on the Medicare CMS Provider Specialty listing. This included providers who were licensed to practice medicine via state licensure agencies. In addition, a very broad definition of "areas of specialization" was used, which included nationally recognized specialties, provider self-designated specialties, areas of practice focus, and any request by any agency or trading partner submitted before the first taxonomy release. This level of detail captured specialty information in categories detailed enough to support those trading credentialing information, yet broad enough to support those wishing to trade directory level specialization information.

In 2001, X12N asked the National Uniform Claim Committee (NUCC) to become the official maintainer of the Health Care Provider Taxonomy code set. The NUCC has a formal operating protocol, including the Code Set Subcommittee's processes. The NUCC is a diverse group of health care industry stakeholders representing providers, payers, designated standards maintenance organizations, public health organizations, and vendors.

Group

A business entity under which one or more individuals practice. A group does not require multiple professional providers. A single provider group is a valid group and would be identified by the business entity name, for instance - John Doe, PC.

193200000X Multi-Specialty **Active**
A business group of one or more individual practitioners, who practice with different areas of specialization.
[7/1/2003: new]

193400000X Single Specialty **Active**
A business group of one or more individual practitioners, all of who practice with the same area of specialization.
[7/1/2003: new]

Allopathic & Osteopathic Physicians

A broad category grouping state licensed providers in allopathic or osteopathic medicine whose scope of practice is determined by education.

207K00000X	Allergy & Immunology	Active
	<p>An allergist-immunologist is trained in evaluation, physical and laboratory diagnosis, and management of disorders involving the immune system. Selected examples of such conditions include asthma, anaphylaxis, rhinitis, eczema, and adverse reactions to drugs, foods, and insect stings as well as immune deficiency diseases (both acquired and congenital), defects in host defense, and problems related to autoimmune disease, organ transplantation, or malignancies of the immune system. <i>Source: American Board of Medical Specialties, 2007, www.abms.org [7/1/2007: added definition, added source]</i></p> <p><i>Additional Resources: American Board of Allergy and Immunology, 2007. http://www.abai.org/</i></p> <p><i>No subspecialty certificates in allergy and immunology are offered by the American Board of Allergy and Immunology (ABAI). The ABAI, however, does offer formal special pathways for physicians seeking dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology.</i></p>	
	207KA0200X Allergy	Active
	Definition to come...	
	207KI0005X Clinical & Laboratory Immunology	Active
	Definition to come...	

207L00000X	Anesthesiology	Active
	<p>An anesthesiologist is trained to provide pain relief and maintenance, or restoration, of a stable condition during and immediately following an operation or an obstetric or diagnostic procedure. The anesthesiologist assesses the risk of the patient undergoing surgery and optimizes the patient's condition prior to, during and after surgery. In addition to these management responsibilities, the anesthesiologist provides medical management and consultation in pain management and critical care medicine. Anesthesiologists diagnose and treat acute, long-standing and cancer pain problems; diagnose and treat patients with critical illnesses or severe injuries; direct resuscitation in the care of patients with cardiac or respiratory emergencies, including the need for artificial ventilation; and supervise post-anesthesia recovery. <i>Source: American Board of Medical Specialties, 2007. www.abms.org [7/1/2007: added definition, added source; 7/1/2011: modified source]</i></p> <p><i>Additional Resources: American Board of Anesthesiology, 2007. http://www.theaba.org/; American Osteopathic Board of Anesthesiology, 2007, http://www.osteopathic.org/certification</i></p> <p><i>Board certification for Medical Doctors (MDs) is provided by the American Board of Anesthesiology. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Anesthesiology.</i></p>	

-
- 207LA0401X Addiction Medicine Active**
An anesthesiologist who specializes in the diagnosis and treatment of addictions.

- Board certification for Medical Doctors (MDs) is provided by the American Board of Anesthesiology. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Anesthesiology.*
- 207LH0002X Hospice and Palliative Medicine Active**
An anesthesiologist with special knowledge and skills to prevent and relieve the suffering experienced by patients with life-limiting illnesses. This specialist works with an interdisciplinary hospice or palliative care team to maximize quality of life while addressing physical, psychological, social and spiritual needs of both patient and family throughout the course of the disease, through the dying process, and beyond for the family. This specialist has expertise in the assessment of patients with advanced disease; the relief of distressing symptoms; the coordination of interdisciplinary patient and family-centered care in diverse venues; the use of specialized care systems including hospice; the management of the imminently dying patient; and legal and ethical decision making in end-of-life care.
Source: American Academy of Hospice and Palliative Medicine [1/1/2007: new]

207LP2900X Pain Medicine **Active**

An anesthesiologist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic and/or cancer pain in both hospital and ambulatory settings. Patient care needs are also coordinated with other specialists.

Source: American Board of Medical Specialties, 2007.

Board certification for Medical Doctors (MDs) is provided by the American Board of Anesthesiology. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Anesthesiology.

207LP3000X Pediatric Anesthesiology **Active**

An anesthesiologist who has had additional skill and experience in and is primarily concerned with the anesthesia, sedation, and pain management needs of infants and children. A pediatric anesthesiologist generally provides services including the evaluation of complex medical problems in infants and children when surgery is necessary, planning and care for children before and after surgery, pain control, anesthesia and sedation for any procedures out of the operating room such as MRI, CT scan, and radiation therapy.

Source: American Academy of Pediatrics [7/1/2006: new]

208U00000X Clinical Pharmacology **Active**

Clinical pharmacology encompasses the spectrum of activities related to the discovery, development, regulation, and utilization of safe and effective drugs.

Source: American Society for Clinical Pharmacology and Therapeutics, 2008 [7/1/2008: modified definition]

Additional Resources: Clinical pharmacology is a recognized fellowship program for physicians, pharmacists, and post-doctoral researchers delivered through medical education institutions accredited by the American Board of Clinical Pharmacology. http://www.ascpt.org/; American Board of Clinical Pharmacology http://www.abcp.net

208C00000X **Colon & Rectal Surgery** **Active**

A colon and rectal surgeon is trained to diagnose and treat various diseases of the intestinal tract, colon, rectum, anal canal and perianal area by medical and surgical means. This specialist also deals with other organs and tissues (such as the liver, urinary and female reproductive system) involved with primary intestinal disease.

Source: American Board of Medical Specialties, 2007. www.abms.org [7/1/2007: added definition, added source]

Additional Resources: American Board of Colon and Rectal Surgery, 2007. <http://www.abcrs.org/>.

Board certification for Medical Doctors (MDs) is provided by the American Board of Colon and Rectal Surgery.

Colon and rectal surgeons have the expertise to diagnose and often manage anorectal conditions such as hemorrhoids, fissures (painful tears in the anal lining), abscesses and fistulae (infections located around the anus and rectum) in the office setting. They also treat problems of the intestine and colon, and perform endoscopic procedures to evaluate and treat problems such as cancer, polyps (precancerous growths) and inflammatory conditions.

207N00000X **Dermatology** **Active**

A dermatologist is trained to diagnose and treat pediatric and adult patients with benign and malignant disorders of the skin, mouth, external genitalia, hair and nails, as well as a number of sexually transmitted diseases. The dermatologist has had additional training and experience in the diagnosis and treatment of skin cancers, melanomas, moles and other tumors of the skin, the management of contact dermatitis and other allergic and nonallergic skin disorders, and in the recognition of the skin manifestations of systemic (including internal malignancy) and infectious diseases. Dermatologists have special training in dermatopathology and in the surgical techniques used in dermatology. They also have expertise in the management of cosmetic disorders of the skin such as hair loss and scars and the skin changes associated with aging.

Source: American Board of Medical Specialties, 2007. www.abms.org [7/1/2007: added definition, added source]

Additional Resources: American Board of Dermatology, 2007. <http://www.abderm.org/>

Board certification is provided by the American Board of Dermatology.

- 207NI0002X Clinical & Laboratory Dermatological Immunology Active**
A dermatologist who utilizes various specialized laboratory procedures to diagnose disorders characterized by defective responses of the body's immune system. Immunodermatologists also may provide consultation in the management of these disorders and administer specialized forms of therapy for these diseases.
Source: American Board of Medical Specialties, 2007. www.abms.org [7/1/2007: added definition, added source]
- Additional Resources: American Board of Dermatology, 2007. <http://www.abderm.org/>*
- Board certification is provided by the American Board of Dermatology.*
- 207ND0900X Dermatopathology Active**
A dermatopathologist has the expertise to diagnose and monitor diseases of the skin including infectious, immunologic, degenerative and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings and smears of skin lesions by means of routine and special (electron and fluorescent) microscopes.
Source: American Board of Medical Specialties, 2007. www.abms.org [7/1/2007: added definition, added source; 7/1/2011: modified source]
- Additional Resources: American Board of Dermatology, 2007. <http://www.abderm.org/>; American Osteopathic Board of Dermatology, 2007. <http://www.osteopathic.org/certification>*
- Board certification for Medical Doctors (MDs) is provided by the American Board of Dermatology. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Dermatology.*
- 207ND0101X MOHS-Micrographic Surgery Active**
The highly-trained surgeons that perform Mohs Micrographic Surgery are specialists both in dermatology and pathology. With their extensive knowledge of the skin and unique pathological skills, they are able to remove only diseased tissue, preserving healthy tissue and minimizing the cosmetic impact of the surgery. Mohs surgeons who belong to the American College of Mohs Surgery (ACMS) have completed a minimum of one year of fellowship training at one of the ACMS-approved training centers in the U.S.

- Additional Resources: Additional Resources: <http://www.mohscollege.org/>; American Board of Dermatology, 2007. <http://www.abderm.org/>*

207NP0225X Pediatric Dermatology **Active**

A pediatric dermatologist has, through additional special training, developed expertise in the treatment of specific skin disease categories with emphasis on those diseases which predominate in infants, children and adolescents.

*Source: American Board of Medical Specialties, 2007.
www.abms.org [7/1/2007: changed definition, added source]*

*Additional Resources: American Board of Dermatology, 2007,
http://www.abderm.org/*

A subspecialty certificate was approved by ABMS in 2000.

ACGME Accredited Residency Program Requirements: None.

207NS0135X Procedural Dermatology **Active**

Procedural Dermatology, a subspecialty of Dermatology, encompassing a wide variety of surgical procedures and methods to remove or modify skin tissue for health or cosmetic benefit. These methods include scalpel surgery, laser surgery, chemical surgery, cryosurgery (liquid nitrogen), electrosurgery, aspiration surgery, liposuction, injection of filler substances, and Mohs micrographic controlled surgery (a special technique for the removal of growths, especially skin cancers).

Source: American Board of Dermatology, 2007 [1/1/2008: definition added, source added, title changed]

Additional Resources: Some ABMS board certified dermatologists have completed a one-year ACGME approved fellowship in Procedural Dermatology, which has been offered since 2003. At this time the ABD does not offer subspecialty certification in Procedural Dermatology.

204R00000X Electrodiagnostic Medicine **Active**

Electrodiagnostic medicine is the medical subspecialty that applies neurophysiologic techniques to diagnose, evaluate, and treat patients with impairments of the neurologic, neuromuscular, and/or muscular systems. Qualified physicians are trained in performing electrophysiological testing and interpretation of the test data. They require knowledge in anatomy, physiology, kinesiology, histology, and pathology of the brain, spinal cord, autonomic nerves, cranial nerves, peripheral nerves, neuromuscular junction, and muscles. They must know clinical features and treatment of diseases of the central, peripheral, and autonomic nervous systems, as well as those of neuromuscular junction and muscle. Physicians also require special knowledge about electric signal processing, including waveform analysis, electronics and instrumentation, stimulation and recording equipment, and statistics.

Board certification for Medical Doctors (MDs) is provided by the American Board of Emergency Medicine. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Emergency Medicine.

207PE0004X Emergency Medical Services Active

An emergency medicine physician who specializes in non-hospital based emergency medical services (e.g., disaster site, accident scene, transport vehicle, etc.) to provide pre-hospital assessment, treatment, and transport patients.

Source: National Uniform Claim Committee, 2009 [1/1/2010: definition added, source added]

Additional Resources: A Certification of Added Qualifications (CAQ) is issued by the American Osteopathic Board of Emergency Medicine.

207PH0002X Hospice and Palliative Medicine Active

An emergency medicine physician with special knowledge and skills to prevent and relieve the suffering experienced by patients with life-limiting illnesses. This specialist works with an interdisciplinary hospice or palliative care team to maximize quality of life while addressing physical, psychological, social and spiritual needs of both patient and family throughout the course of the disease, through the dying process, and beyond for the family. This specialist has expertise in the assessment of patients with advanced disease; the relief of distressing symptoms; the coordination of interdisciplinary patient and family-centered care in diverse venues; the use of specialized care systems including hospice; the management of the imminently dying patient; and legal and ethical decision making in end-of-life care.

207PT0002X Medical Toxicology **Active**

Medical toxicologists are physicians who specialize in the prevention, evaluation, treatment and monitoring of injury and illness from exposures to drugs and chemicals, as well as biological and radiological agents. Medical toxicologists care for people in clinical, academic, governmental and public health settings, and provide poison control center leadership. Important areas of medical toxicology include acute drug poisoning, adverse drug events, drug abuse, addiction and withdrawal, chemicals and hazardous materials, terrorism preparedness, venomous bites and stings and environmental and workplace exposures.

Board certification is provided by the American Board of Emergency Medicine. Board certification for Medical Doctors (MDs) is provided by the American Board of Emergency Medicine.

207PS0010X Sports Medicine Active

An emergency physician with special knowledge in sports medicine is responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention and management of injury and illness. A sports medicine physician has knowledge and experience in the promotion of wellness and the role of exercise in promoting a healthy lifestyle. Knowledge of exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation and epidemiology is essential to the practice of sports medicine.

Board certification for Medical Doctors (MDs) is provided by the American Board of Emergency Medicine. Board certification for Doctors of Osteopathy (DOs) is provided by the American Osteopathic Board of Emergency Medicine.

207PE0005X Undersea and Hyperbaric Medicine Active

A specialist who treats decompression illness and diving accident cases and uses hyperbaric oxygen therapy to treat such conditions as carbon monoxide poisoning, gas gangrene, non-healing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as a consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

207QB0002X Obesity Medicine **Active**

A physician who specializes in the treatment of obesity demonstrates competency in and a thorough understanding of the treatment of obesity and the genetic, biologic, environmental, social, and behavioral factors that contribute to obesity. The obesity medicine physician employs therapeutic interventions including diet, physical activity, behavioral change, and pharmacotherapy. The obesity medicine physician utilizes a comprehensive approach, and may include additional resources such as dietitians, exercise physiologists, mental health professionals and bariatric surgeons as indicated to achieve optimal results. Additionally, the obesity medicine physician maintains competency in providing pre- peri- and post-surgical care of bariatric surgery patients, promotes the prevention of obesity, and advocates for those who suffer from obesity.

Source: American Board of Obesity Medicine [7/1/2015: title and definition modified]

Additional Resource: American Society of Bariatric Physicians, www.asbp.org.

207QS1201X Sleep Medicine **Active**

A Family Medicine Physician who practices Sleep Medicine is certified in the subspecialty of sleep medicine and specializes in the clinical assessment, physiologic testing, diagnosis, management and prevention of sleep and circadian rhythm disorders. Sleep specialists treat patients of any age and use multidisciplinary approaches. Disorders managed by sleep specialists include, but are not limited to, sleep related breathing disorders, insomnia, hypersomnias, circadian rhythm sleep disorders, parasomnias and sleep related movement disorders.

Source: American Academy of Sleep Medicine, 2008 [7/1/2008: new]

207QS0010X	Sports Medicine	Active
<p>A family medicine physician that is trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice) and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.</p>

Additional Resources: American Board of Internal Medicine, 2007. <http://www.abim.org/>.

Board certification for Medical Doctors (MDs) is provided by the American Board of Internal Medicine.

209800000X Legal Medicine Active

Legal Medicine is a special field of medicine that focuses on various aspects of medicine and law. Historically, the practice of legal medicine made contributions to medicine as a scientific instrument to solve criminal perplexities. Since World War II, the domain of legal medicine has broadened to include not only aspects of medical science to solve legal and criminal problems but aspects of law as it applies to medicine. Legal Medicine continues to grow as medicolegal issues like medical malpractice and liability, government regulation of health care, issues of tort reform, and moral and ethical complexities presented by technological advances become increasingly prominent. Many medical schools have implemented courses which supply medicolegal instruction for medical students, and many law schools now offer medicolegal courses. Also, dual degree programs in law and medicine have been created to assist physicians to bridge the gap between medicine and the law.

Source: American Board of Legal Medicine 08/1992 [7/1/2009: definition reformatted]

Additional Resources: Training Programs, and/or Fellowships, Preceptorships: Certification available through the American Board of Legal Medicine. ACGME Accredited Residency Program Requirements: None.

Definition to come.

207U00000X Nuclear Medicine Active

A nuclear medicine specialist employs the properties of radioactive atoms and molecules in the diagnosis and treatment of disease and in research. Radiation detection and imaging instrument systems are used to detect disease as it changes the function and metabolism of normal cells, tissues and organs. A wide variety of diseases can be found in this way, usually before the structure of the organ involved by the disease can be seen to be abnormal by any other techniques. Early detection of coronary artery disease (including acute heart attack), early cancer detection and evaluation of the effect of tumor treatment, diagnosis of infection and inflammation anywhere in the body and early detection of blood clot in the lungs are all possible with these techniques. Unique forms of radioactive molecules can attack and kill cancer cells (e.g., lymphoma, thyroid cancer) or can relieve the severe pain of cancer that has spread to bone

Pain Medicine**208VP0014X Interventional Pain Medicine Active**

Interventional Pain Medicine is the discipline of medicine devoted to the diagnosis and treatment of pain and related disorders principally with the application of interventional techniques in managing subacute, chronic, persistent, and intractable pain, independently or in conjunction with other modalities of treatment.

208VP0000X Pain Medicine Active

Pain Medicine is a primary medical specialty based on a distinct body of knowledge and a well-defined scope of clinical practice that is founded on science, research and education. It is concerned with the study of pain, the prevention of pain, and the evaluation, treatment, and rehabilitation of persons in pain. A comprehensive evaluation incorporates the physical, psychological, cognitive and socio-cultural contributions to pain. The treatment protocol may include pharmacological, invasive, behavioral, cognitive, rehabilitative and complementary strategies provided in a concurrent focused and patient specific manner.

The pain medicine physician often serves the patient as a frontline physician regarding their pain, but also may serve as a consultant to other physicians, direct an interdisciplinary/multidisciplinary treatment team, conduct research, or advocate for the patient's pain care with public and private agencies. The Pain Medicine physician may work in variety of settings including office, clinic, hospital, university, or governmental/public agencies.

208100000X	Physical Medicine & Rehabilitation	Active
-------------------	---	---------------

Physical medicine and rehabilitation, also referred to as rehabilitation medicine, is the medical specialty concerned with diagnosing, evaluating, and treating patients with physical disabilities. These disabilities may arise from conditions affecting the musculoskeletal system such as neck and back pain, sports injuries, or other painful conditions affecting the limbs, such as carpal tunnel syndrome. Alternatively, the disabilities may result from neurological trauma or disease such as spinal cord injury, head injury or stroke. A physician certified in physical medicine and rehabilitation is often called a physiatrist. The primary goal of the physiatrist is to achieve maximal restoration of physical, psychological, social and vocational function through comprehensive rehabilitation. Pain management is often an important part of the role of the physiatrist. For diagnosis and evaluation, a physiatrist may include the techniques of electromyography to supplement the standard history, physical, x-ray and laboratory examinations. The physiatrist has expertise in the appropriate use of therapeutic exercise, prosthetics (artificial limbs), orthotics and mechanical and electrical devices.

208200000X Plastic Surgery Active

A plastic surgeon deals with the repair, reconstruction or replacement of physical defects of form or function involving the skin, musculoskeletal system, craniomaxillofacial structures, hand, extremities, breast and trunk and external genitalia or cosmetic enhancement of these areas of the body. Cosmetic surgery is an essential component of plastic surgery. The plastic surgeon uses cosmetic surgical principles to both improve overall appearance and to optimize the outcome of reconstructive procedures. The surgeon uses aesthetic surgical principles not only to improve undesirable qualities of normal structures but in all reconstructive procedures as well.

2086X0206X Surgical Oncology Active

A surgical oncologist is a well-qualified surgeon who has obtained additional training and experience in the multidisciplinary approach to the prevention, diagnosis, treatment, and rehabilitation of cancer patients, and devotes a major portion of his or her professional practice to these activities and cancer research.

Source: Society of Surgical Oncology, 2007 [1/1/2008: definition added, source added, 7/1/2009: definition reformatted]

Additional Resources: <http://www.surgonc.org/>; American Board of Medical Specialties, 2007, www.abms.org; American Board of Surgery, 2007, <http://www.absurgery.org/>

Surgical oncology is a recognized fellowship subspecialty program of surgery. Separate board certification is not currently offered.

2086S0127X Trauma Surgery Active

Trauma surgery is a recognized subspecialty of general surgery. Trauma surgeons are physicians who have completed a five-year general surgery residency and usually continue with a one to two year fellowship in trauma and/or surgical critical care, typically leading to additional board certification in surgical critical care. There is no trauma surgery board certification at this point. To obtain board certification in surgical critical care, a fellowship in surgical critical care or anesthesiology critical care must be completed during or after general surgery residency.

106H00000X	Marriage & Family Therapist	Active
	A marriage and family therapist is a person with a master's degree in marriage and family therapy, or a master's or doctoral degree in a related mental health field with substantially equivalent coursework in marriage and family therapy, who receives supervised clinical experience, or a person who meets the state requirements to practice as a marriage and family therapist. A marriage and family therapist treats mental and emotional disorders within the context of marriage and family systems. A marriage and family therapist provides mental health and counseling services to individuals, couples, families, and groups.	

102X00000X Poetry Therapist Active

A medical or mental health professional who has attained credentials after satisfactorily completing a poetry therapy training program approved by the National Federation for Biblio/Poetry Therapy (NFBPT). Training includes didactic work, peer group experience, and supervised practicum.

An NFBPT credentialed certified poetry therapist (CPT) or registered poetry therapist (PTR) integrates discussion of published literature and reflective or creative writing into the psychotherapeutic process to achieve goals of emotional well-being, symptom reduction, and improved interpersonal communication.

Certified poetry therapists and registered poetry therapists are licensed mental health professionals with advanced training in the theory and practice of poetry therapy. CPTs and PTRs are qualified to work independently with emotionally troubled populations in clinical, rehabilitative, community and educational institutions. They also work with emotionally healthy individuals adjusting to developmental issues, life crises, or disabilities. The PTR completes an advanced level of training and fieldwork commensurate with the highest levels of clinical practice. The terms poetry therapy, applied poetry facilitation, journal therapy, bibliotherapy, biblio/poetry therapy, and poetry/journal therapy reflect the interactive use of literature and/or writing to promote personal growth and emotional healing. In addition to poetry, poetry therapy applies all forms of written and spoken language including story, myth, folk and fairy tale and other genres of poetic expression as well as journal, memoir, and narrative. The poetry therapy process integrates discussion of published literature and reflective or creative writing for expression and communication of thoughts and feelings to facilitate participants' emotional well-being. The field of poetry therapy encompasses all of these modalities, though only a duly trained and licensed clinical practitioner can be credentialed as CPT or PTR.

102L00000X Psychoanalyst Active

Psychoanalysis is a comprehensive, theoretical framework which, when applied to a treatment process, consists of an intensive verbal, therapeutic relationship between an analyst and an analysand which aims for symptom relief, emotional growth, and personal integration. The psychoanalytic treatment process includes, but is not limited to, the recognition of unconscious processes and conflicts; the significance of developmental influences; and the impact of resistances, defenses, transference and countertransference phenomena. Treatment is enhanced by an understanding developed in the analyst's training and personal analysis of unconscious manifestations, such as dreams, slips of the tongue, fantasies and day dreams. Psychoanalytic technique varies in relation to theoretical orientation.

Chiropractic Providers

A provider qualified by a Doctor of Chiropractic (D.C.), licensed by the State and who practices chiropractic medicine -that discipline within the healing arts which deals with the nervous system and its relationship to the spinal column and its interrelationship with other body systems.

111N00000X	Chiropractor	Active
	A provider qualified by a Doctor of Chiropractic (D.C.), licensed by the State and who practices chiropractic medicine -that discipline within the healing arts which deals with the nervous system and its relationship to the spinal column and its interrelationship with other body systems.	
111NI0013X	Independent Medical Examiner	Active
	A special evaluator not involved with the medical care of the individual examinee that impartially evaluates the care being provided by other practitioners to clarify clinical, disability, liability or other case issues. <i>Source: American Board of Independent Medical Examiners [1/1/2007: new]</i>	
111NI0900X	Internist	Active
	The chiropractic internist may serve as a primary care physician or may see patients referred from other providers for evaluation and co-management. Evaluation is focused on the early detection of functional, nutritional, and pathological disorders. A chiropractic internist utilizes the diagnostic instruments necessary for proper examination. In cases where laboratory examination is necessary, a chiropractic internist utilizes a recognized reference laboratory facility. A chiropractic internist may manage his or her own cases or may refer to another specialist when prudent to do so. The chiropractic internist utilizes documented natural therapies, therapeutic lifestyle changes, patient education and other resources to promote patient health and avoidance of disease. <i>Source: American Chiropractic Association, 2008 [7/1/2009: definition added]</i>	
111NN0400X	Neurology	Active
	Chiropractic Neurology is defined as the field of functional neurology that engages the internal - and external environment of the individual in a structured and targeted approach to affect positive changes in the nervous system and consequently the physiology and behavior of an individual. Chiropractic Neurologists are board-certified specialists in non-drug, non-surgical care for those with neurologically based health problems. There are many conditions people suffer from that are in this broad category: learning and attention disorders, headaches, vertigo, pain syndromes, developmental disorders, nerve injury, spinal cord injury, head injury or stroke, movement disorders, and many other conditions. <i>Source: American Chiropractic Neurology Board, 2008 & American Chiropractic Association, 2008 [7/1/2009: definition added]</i>	

- 111NN1001X Nutrition** **Active**
Chiropractic Nutrition is that specialty within the chiropractic profession that deals with the overall factors that affect the patient's ability to maintain the manipulative correction and thus sustain better neurological integrity. The Chiropractic Nutrition Specialist will perform extensive research on the patient's previous health history, ethnicity, and any family history related to what the patient is being treated for. Patients fill out questionnaires concerning dietary and sleep patterns and previous or present symptomology. A nutrition examination would be performed to assess areas such as absorption rates, adrenal function, kidney health, lung health etc. The patient is often instructed on how to check the pH of their saliva and urine, test for the presence of Candida Albicans, etc., at home. Outside laboratory testing includes blood, urine, hair analysis, food allergy testing etc. The patient's prescription and over the counter medications are recorded and analyzed.
Source: American Chiropractic Association, 2008 [7/1/2009: definition added]
- 111NX0100X Occupational Health** **Active**
Occupational Health is that specialty within the chiropractic profession that deals with the prevention and management of work related injuries. It also considers and assists clients with State and Federal Compliance assistance. Occupational Health goes much farther than simply treating injured workers however. This may mean working with clients to promote optimum safety and ergonomic principles, interacting with the injured worker to promote safety and prevent future injuries, assisting a company with accident investigation to identify root cause, redesigning a workstation to eliminate hazards, working with safety teams, providing training programs etc. The list of potential services that the specialist can interact with a client company or patient is lengthy and varied involving both in office services as well as on site services.
Source: American Chiropractic Association, 2008 [7/1/2009: title modified, definition added]

- 111NX0800X Orthopedic** **Active**
Chiropractic Orthopedics is defined as that branch of chiropractic medicine that includes the continued acquisition of knowledge relative to both normal functions and diseases of the human body as they relate to the bones, joints, capsules, discs, muscles, ligaments, tendons, their complete neurological and vascular components, referred organ systems and contiguous tissues. This also includes the development and perfection of skills relative to health maintenance when such exists and when not, the investigations, historical review, physical detection, correlative diagnosis development and complete management of any disorder within the bounds defined herein. Also necessary is the delivery of the combined knowledge and skill on a primary basis to patients who both need and desire this service to the eventual outcome of remissions, whenever resolution is not readily achievable. In addition the certified chiropractic orthopedist provides consultation services at the request of other qualified doctors seeking assistance in the care of their patients. The chiropractic orthopedist may also engage in the teaching and or research of subjects and materials relevant to pursuing the quest for knowledge in the ever changing field of the orthopedic specialty.
Source: American Chiropractic Association, 2008 [7/1/2009: definition added]
- 111NP0017X Pediatric Chiropractor** **Active**
The Pediatric Chiropractor is a chiropractor with specialized, advanced training and certification in the evaluation, care and management of health and wellness conditions of infancy, childhood and adolescence. This specialist provides primary, comprehensive, therapeutic and preventative chiropractic health care for newborns through adolescents.

111NR0200X Radiology **Active**

Chiropractic radiology is a referral specialty that provides consultation services at the request of other qualified doctors. Chiropractic radiologists provide consultation in health care facilities (private offices, hospitals and teaching institutions) to meet the needs of referring doctors and their patients. The quality of the consultative services by the chiropractic radiologist in independent practice is reflected by the quality of their professional credentials. Chiropractic radiologists recommend, supervise, and interpret radiologic studies as well as advanced imaging procedures. They advise referring physicians on the necessity and appropriateness of radiologic services and whether to select or to avoid certain diagnostic or clinical procedures. In some instances the radiologist may act as a private practitioner. They may conduct research and apply diagnostic radiologic procedures and may be called upon to act as expert witnesses in matters of litigation.

Chiropractic radiologists are also concerned with imaging technology including image production, demonstration of normal and abnormal anatomy, and the interaction of energy and matter. The advances in the technological facets of radiology are so rapid that only qualified radiologists can reasonably be expected to maintain the high level of proficiency required to supervise and interpret these procedures. The practice of radiology continuously involves the application of this technology to patient imaging and treatment.

It is now well recognized that chiropractic radiology includes, but is not limited to, plain film radiography, fluoroscopy, tomography, ultrasonography, radioisotope imaging, computed tomography, digital radiography, and magnetic resonance imaging. Individual practices may vary by intent, licensure, and scope of practice laws.

111NR0400X Rehabilitation **Active**

Rehabilitation is the discipline focused on restoring a patient's functional abilities to pre-injury or pre-disease status. Functional abilities are defined as those activities in one's daily life, work, or sports and recreational activities that an individual participates in. Relevant impairments (e.g. strength, endurance, flexibility, motor control, etc.) are often intermediate goals of rehabilitation, but the final goal of successful care is return to participation in activities in which the patient was successful before the onset of the injury or disease. Essential to a rehabilitation approach is a focus on patient-centered outcomes such as independence and self-management or self-care skills.

Dental Providers

Broad category to identify practitioners who render services related the practice of dentistry. Dentistry is defined as the evaluation, diagnosis, prevention and/or treatment (nonsurgical, surgical or related procedures) of diseases, disorders and/or conditions of the oral cavity, maxillofacial area and/or the adjacent and associated structures and their impact on the human body; provided by a dentist, within the scope of his/her education, training and experience, in accordance with the ethics of the profession and applicable law.

125K00000X	Advanced Practice Dental Therapist An Advanced Practice Dental Therapist is: (1) A dental therapist who has completed additional training beyond basic dental therapy education and provides dental services in accordance with state advanced practice dental therapist laws or statutes; or (2) A dental hygienist with a graduate degree in advanced dental therapy prepared for independent and interdependent decision making and direct accountability for clinical judgment across the dental health care continuum. The individual has been authorized by the relevant state board or a tribal entity to provide services under the remote supervision of a dentist. The functions of the advanced practice dental therapist vary based on the needs of the dentist, the educational preparation of the advanced practice dental therapist and state dental practice acts and regulations. <i>Source: Summarized from Minnesota Statute 150A.106. [7/1/2012: new]</i>	Active
126800000X	Dental Assistant An individual who may or may not have completed an accredited dental assisting education program and who aids the dentist in providing patient care services and performs other nonclinical duties in the dental office or other patient care facility. The scope of the patient care functions that may be legally delegated to the dental assistant varies based on the needs of the dentist the educational preparation of the dental assistant and state dental practice acts and regulations. Patient care services are provided under the supervision of a dentist. To avoid misleading the public, no occupational title other than dental assistant should be used to describe this dental auxiliary. <i>Source: Comprehensive Policy Statement on Dental Auxiliaries, American Dental Association</i>	Active
124Q00000X	Dental Hygienist An individual who has completed an accredited dental hygiene education program, and an individual who has been licensed by a state board of dental examiners to provide preventive care services under the supervision of a dentist. Functions that may be legally delegated to the dental hygienist vary based on the needs of the dentist, the educational preparation of the dental hygienist and state dental practice acts and regulations, but always include, at a minimum, scaling and polishing the teeth. To avoid misleading the public, no occupational title other than dental hygienist should be used to describe this dental auxiliary. <i>Source: Comprehensive Policy Statement on Dental Auxiliaries, American Dental Association.</i>	Active

12690000X	Dental Laboratory Technician	Active
	<p>An individual who has the skill and knowledge in the fabrication of dental appliances, prostheses and devices in accordance with a dentist's laboratory work authorization. To avoid misleading the public, no occupational title other than dental laboratory technician or certified dental technician (when appropriate) should be used to describe this auxiliary.</p> <p><i>Source: Comprehensive Policy Statement on Dental Auxiliaries, American Dental Association.</i></p>	
<hr/>		
125J0000X	Dental Therapist	Active
	<p>A Dental Therapist is an individual who has completed an accredited or non-accredited dental therapy program and who has been authorized by the relevant state board or a tribal entity to provide services within the scope of their practice under the supervision of a dentist. Functions that may be delegated to the dental therapist vary based on the needs of the dentist, the educational preparation of the dental therapist and state dental practice acts and regulations.</p> <p><i>Source: Summarized from Minnesota Statute 150A.105. [7/1/2012: new]</i></p>	
<hr/>		
12230000X	Dentist	Active
	<p>A dentist is a person qualified by a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), licensed by the state to practice dentistry, and practicing within the scope of that license. There is no difference between the two degrees: dentists who have a DMD or DDS have the same education. Universities have the prerogative to determine what degree is awarded. Both degrees use the same curriculum requirements set by the American Dental Association's Commission on Dental Accreditation. Generally, three or more years of undergraduate education plus four years of dental school is required to graduate and become a general dentist. State licensing boards accept either degree as equivalent, and both degrees allow licensed individuals to practice the same scope of general dentistry. Additional post-graduate training is required to become a dental specialist.</p> <p><i>Source: Council on Dental Education and Licensure, American Dental Association</i></p>	
	1223D0001X	Dental Public Health
	<p>The science and art of preventing and controlling dental diseases and promoting dental health through organized community efforts. It is that form of dental practice that serves the community as a patient rather than the individual. It is concerned with the dental health education of the public, with applied dental research, and with the administration of group dental care programs as well as the prevention and control of dental diseases on a community basis.</p> <p><i>Source: Council on Dental Education and Licensure, American Dental Association</i></p>	
	1223D0004X	Dentist Anesthesiologist
	<p>A dentist who has successfully completed an accredited postdoctoral anesthesiology residency training program for dentists of two or more years duration, in accord with Commission on Dental Accreditation's Standards for Dental Anesthesiology Residency Programs, and/or meets the eligibility requirements for examination by the American Dental Board of Anesthesiology.</p> <p><i>Source: The American Society of Dentist Anesthesiologists [1/1/2013: new]</i></p>	

1223E0200X	Endodontics The branch of dentistry that is concerned with the morphology, physiology and pathology of the human dental pulp and periradicular tissues. Its study and practice encompass the basic and clinical sciences including biology of the normal pulp, the etiology, diagnosis, prevention and treatment of diseases and injuries of the pulp and associated periradicular conditions. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active
1223G0001X	General Practice A general dentist is the primary dental care provider for patients of all ages. The general dentist is responsible for the diagnosis, treatment, management and overall coordination of services related to patients' oral health needs. <i>Source: Academy of General Dentistry</i>	Active
1223P0106X	Oral and Maxillofacial Pathology The specialty of dentistry and discipline of pathology that deals with the nature, identification, and management of diseases affecting the oral and maxillofacial regions. It is a science that investigates the causes, processes, and effects of these diseases. The practice of oral and maxillofacial pathology includes research and diagnosis of diseases using clinical, radiographic, microscopic, biochemical, or other examinations. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active
1223X0008X	Oral and Maxillofacial Radiology The specialty of dentistry and discipline of radiology concerned with the production and interpretation of images and data produced by all modalities of radiant energy that are used for the diagnosis and management of diseases, disorders and conditions of the oral and maxillofacial region. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active
1223S0112X	Oral and Maxillofacial Surgery The specialty of dentistry which includes the diagnosis, surgical and adjunctive treatment of diseases, injuries and defects involving both the functional and esthetic aspects of the hard and soft tissues of the oral and maxillofacial region. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active

1223X0400X	Orthodontics and Dentofacial Orthopedics That area of dentistry concerned with the supervision, guidance and correction of the growing or mature dentofacial structures, including those conditions that require movement of teeth or correction of malrelationships and malformations of their related structures and the adjustment of relationships between and among teeth and facial bones by the application of forces and/or the stimulation and redirection of functional forces within the craniofacial complex. Major responsibilities of orthodontic practice include the diagnosis, prevention, interception and treatment of all forms of malocclusion of the teeth and associated alterations in their surrounding structures; the design, application and control of functional and corrective appliances; and the guidance of the dentition and its supporting structures to attain and maintain optimum occlusal relations in physiologic and esthetic harmony among facial and cranial structures.	Active
1223P0221X	Pediatric Dentistry An age-defined specialty that provides both primary and comprehensive preventive and therapeutic oral health care for infants and children through adolescence, including those with special health care needs. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active
1223P0300X	Periodontics That specialty of dentistry which encompasses the prevention, diagnosis and treatment of diseases of the supporting and surrounding tissues of the teeth or their substitutes and the maintenance of the health, function and esthetics of these structures and tissues. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active
1223P0700X	Prosthodontics That branch of dentistry pertaining to the restoration and maintenance of oral functions, comfort, appearance and health of the patient by the restoration of natural teeth and/or the replacement of missing teeth and contiguous oral and maxillofacial tissues with artificial substitutes. <i>Source: Council on Dental Education and Licensure, American Dental Association</i>	Active

(2)) Lexikon: Dictionary of Health Care Terms, Organizations and Acronyms for the Era of Reform, The Joint Commission on Accreditation of Healthcare Organizations, Oakbrook Terrace, Illinois: 1994, p. 776.

3747A0650X Attendant Care Provider Active

An individual who provides hands-on care, of both a supportive and health related nature, specific to the needs of a medically stable, physically handicapped individual. Supportive services are those that substitute for the absence, loss, diminution, or impairment of a physical or cognitive function. This service may include skilled or nursing care to the extent permitted by state law.

[7/1/2003: new]

3747P1801X Personal Care Attendant Active

An individual who provides assistance with eating, bathing, dressing, personal hygiene, activities of daily living as specified in the plan of care. Services which are incidental to the care furnished, or essential to the health and welfare of the individual may also be provided. Personal care providers must meet state defined training and certification standards

[7/1/2003: definition added]

Other Service Providers

Providers not otherwise classified, who perform or administer services in or related to the delivery or research of health care services, disease, and restoration of health. An individual provider who is not represented in one of the identified categories but whose data may be needed for clinical, operational or administrative processes.

171100000X	Acupuncturist An acupuncturist is a person who performs ancient therapy for alleviation of pain, anesthesia and treatment of some diseases. Acupuncturists use long, fine needles inserted into specific points in order to treat painful conditions or produce anesthesia.	Active
171M00000X	Case Manager/Care Coordinator A person who provides case management services and assists an individual in gaining access to needed medical, social, educational, and/or other services. The person has the ability to provide an assessment and review of completed plan of care on a periodic basis. This person is also able to take collaborative action to coordinate the services with other providers and monitor the enrollee's progress toward the cost-effective achievement of objectives specified in the plan of care. Credentials may vary from an experience in the fields of psychology, social work, rehabilitation, nursing or a closely related human service field, to a related Assoc of Arts Degree or to nursing credentials. Some states may require certification in case management. <i>Source: CMS State Medicaid Manual Section 4442.3 [7/1/2006: new]</i>	Active
174V00000X	Clinical Ethicist A clinical ethicist has been trained in bioethics and ethics case consultation. The clinical ethicist addresses medical-ethical dilemmas arising in clinical practice, such as end-of-life care, refusal of treatment, and futility of care; assists patients and health care providers with medical decision-making; and provides ethics education for patients and families. <i>Source: National Uniform Claim Committee [1/1/2011: new]</i>	Active
172V00000X	Community Health Worker Community health workers (CHW) are lay members of communities who work either for pay or as volunteers in association with the local health care system in both urban and rural environments and usually share ethnicity, language, socioeconomic status and life experiences with the community members they serve. They have been identified by many titles such as community health advisors, lay health advocates, "promotores(as), outreach educators, community health representatives, peer health promoters, and peer health educators. CHWs offer interpretation and translation services, provide culturally appropriate health education and information, assist people in receiving the care they need, give informal counseling and guidance on health behaviors, advocate for individual and community health needs, and provide some direct services such as first aid and blood pressure screening. Some examples of these practitioners are Community Health Aides or Practitioners established under 25 USC §1616 (l) under HHS, Indian Health Service, Public Health Service. <i>Source: Health Resources and Services Administration, US Department of Health and Human Services – National Workforce Study on Community Health Workers, March, 2007. [7/1/2007: new]</i>	Active

171W00000X	Contractor	Active
	A person who contracts to supply certain materials or do certain work for a stipulated sum; esp., one whose business is contracting work in any of the building trades. For purposes of the taxonomy, a person who contracts to complete home repairs or modifications to accommodate a health condition (e.g. wheelchair ramp, kitchen counter lowering). <i>Source: Websters New World Dictionary of the American Language, Second College Edition, William Collins + World Publishing Co., Inc., New York: 1974, p. 308</i>	
	171WH0202X Home Modifications	Active
	Definition to come...	
	171WV0202X Vehicle Modifications	Active
	A contractor who makes modifications to private vehicles to accommodate a health condition.	
172A00000X	Driver	Active
	A person employed to operate a motor vehicle as a carrier of persons or property.	
176P00000X	Funeral Director	Active
	A person, usually an embalmer, whose business is to arrange for the burial or cremation of the dead and to assist at the funeral rites. <i>Source: Joint Commission on Accreditation of Healthcare Organizations, Lexikon: Dictionary of Health Care Terms, Organizations and Acronyms for the Era of Reform, Oakbrook Terrace, IL: 1994, p. 323</i>	
170300000X	Genetic Counselor, MS	Active
	A masters trained health care provider who collects and interprets genetic family histories; assesses the risk of disease occurrence or recurrence; identifies interventions to manage or ameliorate disease risk; educates about inheritance, testing, management, prevention, ethical issues, resources, and research; and counsels to promote informed choices and adaptation. Certification was established in 1993 by the American Board of Genetic Counseling and prior to that by the American Board of Medical Genetics. Requirements for experience, licensure, and job responsibilities vary among the states. <i>Source: National Society of Genetic Counselors [7/1/2005: new]</i>	
174H00000X	Health Educator	Active
	Health educators work in a variety of settings providing education to individuals or groups of individuals on healthy behaviors, wellness, and health-related topics with the goal of preventing diseases and health problems. Health educators generally require a bachelor's degree and may receive additional training, such as through mentoring, internships, or volunteer work. <i>Source: National Uniform Claim Committee, 2009 [7/1/2009: definition added]</i>	
175L00000X	Homeopath	Active
	A provider who is educated and trained in a system of therapeutics in which diseases are treated by drugs which are capable of producing in healthy persons symptoms like those of the disease to be treated. Treatment requires administering a drug in minute doses. <i>Source: Dorland's Illustrated Medical Dictionary. 26th edition. Philadelphia: W.B. Saunders Company, 1981.</i>	

171R00000X	Interpreter	Active
	<p>An Interpreter is a person who translates oral communication between two or more people. This includes translating from one language to another or interpreting sign language. An interpreter is necessary for medical care when the patient does not speak the language of the health care provider or when the patient has a disability involving spoken language.</p> <p><i>Source: National Medicaid EDI HIPAA NPI Sub Work Group [7/1/2006: new]</i></p>	
174N00000X	Lactation Consultant, Non-RN	Active
	<p>An individual trained to provide breastfeeding assistance services to both mothers and infants. Lactation Consultants are not required to be nurses and are trained through specific courses of education. The Lactation Consultant may have additional certification through a national or international organization.</p> <p><i>Source: National Uniform Claim Committee [1/1/2011: new]</i></p>	
173000000X	Legal Medicine	Active
	<p>The specialty areas of medicine concerned with matters of, and relations with, substantive law and legal institutions; such as the conduct of medical examinations at crime scenes, performance of autopsies, giving of expert medical testimony in judicial proceedings, medical treatment of inmates of penal institutions, the practice of trauma medicine in law enforcement settings, and other clinical practice and medical science applications in the fields of law, law enforcement, and corrections.</p> <p><i>Source: Rhea, Ott, and Shafritz, The Facts On File Dictionary of Health Care Management, New York: Facts On File Publications, 1988.</i></p>	
172M00000X	Mechanotherapy	Active
	<p>A practitioner of mechanotherapy examines patients by verbal inquiry, examination of the musculoskeletal system by hand, and visual inspection and observation. In the treatment of patients, mechanotherapists employ the techniques of advised or supervised exercise; electrical neuromuscular stimulation; massage or manipulation; or air, water, heat, cold, sound, or infrared ray therapy.</p> <p><i>Source: Summarized from Ohio Revised Code 4731.15 [1/1/2007: new]</i></p>	
176B00000X	Midwife	Active
	<p>A Midwife is a trained professional with special expertise in supporting women to maintain a healthy pregnancy birth, offering expert individualized care, education, counseling, and support to a woman and her newborn throughout the childbearing cycle. A Midwife is a skilled and independent practitioner who has undergone formalized training. Midwives are not required to be nurses and may be trained via multiple routes of education (apprenticeship, workshop, formal classes, or programs, etc., usually a combination). The educational background requirements and licensing requirements vary by state. The Midwife may or may not be certified by a state or national organization.</p> <p><i>Source: The National Uniform Claim Committee [7/1/2007: title changed, definition changed, source changed]</i></p>	
175M00000X	Midwife, Lay	Active
	<p>A person qualified by experience and limited specialized training to provide obstetric and neo-natal care in the management of women having normal pregnancy, labor and childbirth. The lay midwife is licensed in some states.</p>	

17100000X	Military Health Care Provider	Active
	Active duty military health care providers not otherwise classified who need to be separately identified for operational, clinical, or administrative processes. <i>[7/1/2005: new]</i>	
171011002X	Independent Duty Corpsman	Active
	A Navy Independent Duty Corpsman (IDC) is an active duty Sailor who has successfully completed one of the Navy's specific IDC training programs. IDCs are formally trained and educated to perform primary medical care and minor surgical services in a variety of health care and non-health care settings worldwide under indirect physician supervision. IDCs provide care to Department of Defense operational forces and other supporting forces such as contractors and foreign nationals. <i>Source: Bureau of Medicine and Surgery, Department of the Navy [7/1/2005: new]</i>	
171011003X	Independent Duty Medical Technicians	Active
	An Independent Duty Medical Technician (IDMT) is specially trained and educated to perform primary medical care, minor surgical services, and treatment of dental disorders for active duty military members in a variety of health care and non-health care settings worldwide under direct and indirect physician supervision. An IDMT may take medical histories, perform physical exams, order lab tests and x-rays, prescribe medications, and give immunizations. IDMTs work under the direct supervision of a physician preceptor when at home station and indirectly when assigned to a Mobile Aid Station, Mobile Medical Unit, remote site, or otherwise deployed specifically as an IDMT. An IDMT may be an experienced Aerospace Medical Service Technician who meets special task qualifications and is recommended for training by the Aerospace Medical Service Functional Manager at their Medical Treatment Facility. IDMTs maintain certification as Nationally Registered Emergency Medical Technicians and as Immunization Back-up Technicians. <i>Source: Air Force Surgeon General Office [7/1/2005: new]</i>	
172P00000X	Naprapath	Active
	Naprapathy means a branch of medicine that focuses on the evaluation and treatment of neuron-muscular conditions. Doctors of naprapathy are connective tissue specialists. Education and training are defined through individual states' licensing/certification requirements. <i>Source: National Uniform Claim Committee [1/1/2007: new]</i>	

175F00000X	Naturopath	Active
	<p>Diagnoses, treats, and cares for patients, using system of practice that bases treatment of physiological functions and abnormal conditions on natural laws governing human body: Utilizes physiological, psychological, and mechanical methods, such as air, water, light, heat, earth, phototherapy, food and herb therapy, psychotherapy, electrotherapy, physiotherapy, minor and orificial surgery, mechanotherapy, naturopathic corrections and manipulation, and natural methods or modalities, together with natural medicines, natural processed foods, and herbs and nature's remedies. Excludes major surgery, therapeutic use of x ray and radium, and use of drugs, except those assimilable substances containing elements or compounds which are components of body tissues and are physiologically compatible to body processes for maintenance of life.</p> <p><i>Source: The Federal Dictionary of Occupational Titles, U.S. Department of Labor, Washington, D.C., section #079, 101-014 [7/1/2007: definition changed, source added]</i></p>	
175T00000X	Peer Specialist	Active
	<p>Individuals certified to perform peer support services through a training process defined by a government agency, such as the Department of Veterans Affairs or a state mental health department/certification/licensing authority.</p> <p><i>Source: National Uniform Claim Committee [7/1/2014: new]</i></p>	
170100000X	Ph.D. Medical Genetics	Active
	<p>A medical geneticist works in association with a medical specialist, is affiliated with a clinical genetics program, and serves as a consultant to medical and dental specialists.</p> <p><i>A general certificate was first issued by ABMS in 1982.</i></p> <p><i>ACGME Accredited Residency Program Requirements: None.</i></p>	
405300000X	Prevention Professional	Active
	<p>Prevention Professionals work in programs aimed to address specific patient needs, such as suicide prevention, violence prevention, alcohol avoidance, drug avoidance, and tobacco prevention. The goal of the program is to reduce the risk of relapse, injury, or re-injury of the patient. Prevention Professionals work in a variety of settings and provide appropriate case management, mediation, referral, and mentorship services. Individuals complete prevention professionals training for the population of patients with whom they work.</p> <p><i>Source: National Uniform Claim Committee, 2015 [1/1/2016: new]</i></p>	

173C00000X	Reflexologist	Active
<p>Reflexologists perform a non-invasive complementary modality involving thumb and finger techniques to apply alternating pressure to the reflexes within the reflex maps of the body located on the feet, hands, and outer ears. Reflexologists apply pressure to specific areas (feet, hands, and ears) to promote a response from an area far removed from the tissue stimulated via the nervous system and acupuncture meridians. Reflexologists are recommended to complete a minimum of 200 hours of education, typically including anatomy & physiology, Reflexology theory, body systems, zones, meridians & relaxation response, ethics, business standards, and supervised practicum.</p>		
<p><i>Source: National Uniform Claim Committee (based on the American Reflexology Certification Board definition of Reflexology), 2007 [1/1/2008: new]</i></p>		
<p><i>Additional Resources: Foot and hand reflexology is a scientific art based on the premise that there are zones and reflex areas in the feet and hands which correspond to all body parts. The physical act of applying specific pressures using thumb, finger and hand techniques result in stress reduction which causes a physiological change in the body. Reflexology is a non-invasive, complementary modality involving thumb and finger techniques to apply alternating pressure to reflexes shown on reflex maps of the body located on the feet, hands, and outer ears.</i></p>

Pharmacy Service Providers

A broad category grouping providers who render services relating to the preparation and dispensing of drugs.

183500000X	Pharmacist	Active
	An individual licensed by the appropriate state regulatory agency to engage in the practice of pharmacy.	
	The practice of pharmacy includes, but is not limited to, assessment, interpretation, evaluation, and implementation, initiation, monitoring or modification of medication and or medical orders; the compounding or dispensing of medication and or medical orders; participation in drug and device procurement, storage, and selection; drug administration; drug regimen reviews; drug or drug-related research; provision of patient education and the provision of those acts or services necessary to provide medication therapy management services in all areas of patient care.	
	<i>Source: Adapted from National Association of Boards of Pharmacy Model State Pharmacy Act, Article 1, Section 104. [1/1/2006: definition modified, source modified]</i>	
1835P2201X	Ambulatory Care	Active
	A licensed pharmacist who has demonstrated specialized knowledge and skill in the provision of integrated, accessible health care services by pharmacists and is accountable for addressing medication needs, developing sustained partnerships with patients, and practicing in the context of family and community.	
	<i>Source: Board of Pharmacy Specialties, www.bpsweb.org [7/1/2015: new]</i>	
1835C0205X	Critical Care	Active
	A licensed pharmacist who has demonstrated specialized knowledge and skill in the delivery of patient care services by pharmacists, as integral members of interprofessional teams, working to ensure the safe and effective use of medications in critically ill patients.	
	<i>Source: Board of Pharmacy Specialties, www.bpsweb.org [1/1/2016: new]</i>	
1835G0000X	General Practice	Inactive
	<i>[1/1/2006: marked inactive, use value 183500000X]</i>	
1835G0303X	Geriatric	Active
	A pharmacist who is certified in geriatric pharmacy practice is designated as a "Certified Geriatric Pharmacist" (CGP). To become certified, candidates are expected to be knowledgeable about principles of geriatric pharmacotherapy and the provision of pharmaceutical care to the elderly.	
	<i>Source: Commission for Certification in Geriatric Pharmacy (www.ccgp.org) [7/1/2006: new]</i>	
1835N0905X	Nuclear	Active
	A licensed pharmacist who has demonstrated specialized knowledge and skill in procurement, compounding, quality control testing, dispensing, distribution, and monitoring of radiopharmaceuticals.	
	<i>Source: Specialty certification and recertification program administered by Board of Pharmaceutical Specialties, www.bpsweb.org [7/1/2006: modified title, added definition]</i>	

1835N1003X	Nutrition Support A licensed pharmacist who has demonstrated specialized knowledge and skill in maintenance and/or restoration of optimal nutritional status, designing and modifying treatment according to patient needs. <i>Source: Specialty certification and recertification program administered by Board of Pharmaceutical Specialties, www.bpsweb.org [7/1/2006: definition modified]</i>	Active
1835X0200X	Oncology A licensed pharmacist who has demonstrated specialized knowledge and skill in developing, recommending, implementing, monitoring, and modifying pharmacotherapeutic plans to optimize outcomes in patients with malignant diseases. <i>Source: Specialty certification and recertification program administered by Board of Pharmaceutical Specialties, www.bpsweb.org [7/1/2006: new]</i>	Active
1835P0200X	Pediatrics A licensed pharmacist who has demonstrated specialized knowledge and skill in the delivery of patient care services by pharmacists that ensures the safe and effective use of medications for all children from neonates through adolescents. <i>Source: Board of Pharmacy Specialties, www.bpsweb.org [1/1/2016: new]</i>	Active
1835P0018X	Pharmacist Clinician (PhC)/ Clinical Pharmacy Specialist Pharmacist Clinician/Clinical Pharmacy Specialist is a pharmacist with additional training and an expanded scope of practice that may include prescriptive authority, therapeutic management, and disease management. <i>Source: National Uniform Claim Committee, 2007 [1/1/2008: new]</i>	Active
1835P1200X	Pharmacotherapy A licensed pharmacist who has demonstrated specialized knowledge and skill in optimizing pharmacotherapeutic care of patients, by developing, implementing, monitoring, and modifying complex treatment plans, providing advanced level education and consultation, and collaborating with other health professionals in the management of therapy. <i>Source: Specialty certification and recertification program administered by Board of Pharmaceutical Specialties, www.bpsweb.org [7/1/2006: modified definition]</i>	Active
1835P1300X	Psychiatric A licensed pharmacist who has demonstrated specialized knowledge and skill in optimizing care of patients with psychiatric illness by assessing and monitoring patients, recognizing drug-induced problems, and recommending appropriate treatment plans. <i>Source: Specialty certification and recertification program administered by Board of Pharmaceutical Specialties, www.bpsweb.org [7/1/2006: modified title, added definition]</i>	Active

183700000X

Pharmacy Technician

Active

A person who works under the direct supervision of a licensed pharmacist and performs many pharmacy-related functions that do not require the professional judgment of a pharmacist.

Source: Pharmacy Technician Certification Board, www.ptcb.org [1/1/2006: modified definition, modified source]

Physician Assistants and Advanced Practice Nursing Providers

A broad grouping of providers who are: 1) trained, educated, and certified to perform basic medical and minor surgical services (or to assist the physician in performance of more complex services) under general physician supervision; and 2) trained, educated at a post-graduate level, and certified to perform autonomous and specialized roles as nurse practitioners, midwives, nurse anesthetists, or clinical nurse specialists.

367A00000X	Advanced Practice Midwife	Active
<p>Midwifery practice as conducted by certified nurse-midwives (CNMs) and certified midwives (CMs) is the independent management of women's health care, focusing particularly on pregnancy, childbirth, the post partum period, care of the newborn, and the family planning and gynecologic needs of women. The CNM and CM practice within a health care system that provides for consultation, collaborative management, or referral, as indicated by the health status of the client. CNMs and CMs practice in accord with the Standards for the Practice of Midwifery, as defined by the American College of Nurse-Midwives (ACNM).</p> <p><i>Source: American College of Nurse-Midwives, 2008 [7/1/2008: title changed, definition changed, source changed]</i></p> <p><i>Additional Resources: American College of Nurse-Midwives www.acnm.org. The American Midwifery Certification Board, Inc. [AMCB, formerly the ACNM Certification Council, Inc. (ACC)] opened its national certification exam to non-nurse graduates of midwifery education programs and issued the first certified midwife (CM) credential in 1997. Certified midwives are educated to meet the same high standards that certified nurse-midwives must meet. These are the standards that every state in the U.S. has recognized as the legal basis for nurse-midwifery practice. All education programs for CMs, like CNMs, award a post-baccalaureate certificate or higher degree. CMs take the same AMCB certification exam as CNMs and study side by side with nurse-midwifery students in some education programs. As an organization, ACNM supports efforts to legally recognize CMs as qualified midwifery practitioners granted the same rights and responsibilities as CNMs.</i></p>		
367H00000X	Anesthesiologist Assistant	Active
<p>An individual certified by the state to perform anesthesia services under the direct supervision of an anesthesiologist. Anesthesiologist Assistants are required to have a bachelor's degree with a premed curriculum prior to entering a two-year anesthesiology assistant program, which is focused upon the delivery and maintenance of anesthesia care as well as advanced patient monitoring techniques. An Anesthesiologist Assistant must work as a member of the anesthesia care team under the direction of a qualified Anesthesiologist.</p>		
364S00000X	Clinical Nurse Specialist	Active
<p>A registered nurse who, through a graduate degree program in nursing, or through a formal post-basic education program or continuing education courses and clinical experience, is expert in a specialty area of nursing practice within one or more of the components of direct patient/client care, consultation, education, research and administration.</p> <p><i>Sources: American Nurses Association, American Nurses Credentialing Center, 1996 Certification Catalogue and The Interagency Conference on Nursing Statistics.</i></p>

225A00000X	Music Therapist	Active
<p>Music therapists use music interventions to assess clients' strengths and needs, develop goals, implement services, and evaluate and document progress for individuals of all ages. Music therapists facilitate changes in physical, cognitive, emotional, and/or psychosocial health.</p> <p><i>Source: American Music Therapy Association</i></p>		

225X00000X**Occupational Therapist****Active**

An occupational therapist is a person who has graduated from an entry-level occupational therapy program accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) or predecessor organizations, or approved by the World Federation of Occupational Therapists (WFOT), or an equivalent international occupational therapy education program; has successfully completed a period of supervised fieldwork experience required by the occupational therapy program; has passed a nationally recognized entry-level examination for occupational therapists, and fulfills state requirements for licensure, certification, or registration. An occupational therapist provides interventions based on evaluation and which emphasize the therapeutic use of everyday life activities (i.e., occupations) with individuals or groups for the purpose of facilitating participation in roles and situations and in home, school, workplace, community and other settings. Occupational therapy services are provided for the purpose of promoting health and wellness and are provided to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapists address the physical, cognitive, psychosocial, sensory, and other aspects of occupational performance in a variety of contexts to support engagement in everyday life activities that affect health, well-being, and quality of life.

225XR0403X Driving and Community Mobility**Active**

Occupational therapists can optimize and prolong an older driver's ability to drive safely and ease the transition to other forms of transportation if driving cessation becomes necessary. By identifying strengths as well as physical or cognitive challenges, occupational therapists can evaluate an individual's overall ability to operate a vehicle safely and recommend assistive devices or behavioral changes to limit risks. Occupational therapy practitioners offer a continuum of services related to community mobility, from evaluation of driving performance, through counseling and support for lifestyle changes, to maintaining independence and quality of life.

Source: The Guide to Occupational Therapy Practice, 2nd edition. Bethesda: American Occupational Therapy Association, 2007. [7/1/2008: title changed, definition added, source added]

Additional Resources: The American Occupational Therapy Association (OTA) does offer voluntary specialty certification for a Driving & Community Mobility Occupational Therapist if the applicant meets the following requirements:

- *Professional or technical degree or equivalent in occupational therapy.*
- *Certified or licensed by and in good standing with an OTA recognized credentialing or regulatory body.*
- *Minimum of 2,000 hours of experience as an occupational therapist or occupational therapy assistant.*
- *600 hours of experience delivering occupational therapy services in the certification area to clients (individuals, groups, or populations) in the last 3 calendar years. Service delivery may be paid or voluntary.*
- *Verification of employment.*

OTA Fact Sheets: Older Driver

225XE0001X Environmental Modification **Active**

Occupational therapy practitioners are experts at identifying the cause of difficulties in performance of activities of daily living and instrumental activities of daily living. Occupational therapy practitioners evaluate the client, their environment, and their occupational performance in that environment, as well as make recommendations for products to improve the fit between the client, place, and activity. Occupational therapists can evaluate both the skills of the client and the environmental features that support or limit the performance of meaningful or necessary activities, thereby enhancing health, safety and well-being. Based on this assessment, they recommend modification and intervention strategies that improve the fit between the person and his or her environment.

225XP0200X Pediatrics Active

Occupational therapists provide services to infants, toddlers and children who have or who are at risk for developmental delays or disabilities. Occupational therapy is concerned with a child's ability to participate in daily life activities or "occupations." Occupational therapists use their unique expertise to help children with social-emotional, physical, cognitive, communication, and adaptive behavioral challenges and to help children to be prepared for and perform important learning and school-related activities and to fulfill their role as students. Through an understanding of the impact of disability, illness, and impairment on a child's development, plan, ability to learn new skills, and overall occupational performance, occupational therapists design interventions that promote healthy development, establish needed skills, and/or modify environments, all in support of participation in daily activities.

225XP0019X Physical Rehabilitation**Active**

Occupational therapists are experts at helping people lead as independent a life as possible. Occupational therapists bring an understanding of the physical and psychological implications of illness and injury and their effects on peoples' ability to perform the tasks of daily living. Occupational therapists provide interventions that can aide a person in completing ADL and IADL tasks, such as dressing, bathing, preparing meals, and driving. They also may fabricate custom orthotics to improve function, evaluate the environment for safety hazards and recommend adaptations to remove those hazards, help a person compensate for cognitive changes, and build a persons' physical endurance and strength. Occupational therapists' knowledge of adapting tasks and modifying the environment to compensate for functional limitations is used to increase the involvement of clients and to promote safety and success.

225100000X Physical Therapist Active

(1) Physical therapists are health care professionals who evaluate and treat people with health problems resulting from injury or disease. PT's assess joint motion, muscle strength and endurance, function of heart and lungs, and performance of activities required in daily living, among other responsibilities. Treatment includes therapeutic exercises, cardiovascular endurance training, and training in activities of daily living. (2) A physical therapist is a person qualified by an accredited program in physical therapy, licensed by the state, and practicing within the scope of that license. Physical therapists treat disease, injury, or loss of a bodily part by physical means, such as the application of light, heat, cold, water, electricity, massage and exercise. They develop treatment plans based upon each patient's strengths, weaknesses, range of motion and ability to function. (3) A health professional who specializes in physical therapy- the health care field concerned primarily with the treatment of disorders with physical agents and methods, such as massage, manipulation, therapeutic exercises, cold, heat (including short-wave, microwave, and ultrasonic diathermy), hydrotherapy, electric stimulation and light to assist in rehabilitating patients and in restoring normal function after an illness or injury.

225200000X	Physical Therapy Assistant (1)Physical therapist assistants are skilled health care providers who are graduates of a physical therapist assistant associate degree program accredited by an agency recognized by the Secretary of the U.S. Department of Education or Council on Postsecondary Accreditation, who assists the physical therapist in providing physical therapy. The supervising physical therapist is directly responsible for the actions of the physical therapist assistant. The PTA performs physical therapy procedures and related tasks that have been selected and delegated by the supervising physical therapist. Duties of the PTA include assisting the physical therapist in implementing treatment programs, training patients in exercised and activities of daily living, conducting treatments, and reporting to the physical therapist on the patient's responses. In addition to direct patient care, the PTA may also perform such functions as patient transport, and clinic or equipment preparation and maintenance. Currently more than half of all states require PTAs to be licensed, registered or certified. (2) An individual who works under the supervision of a physical therapist to assist him or her in providing physical therapy services. A physical therapy assistant may, for instance, help patients follow an appropriate exercise program that will increase their strength, endurance, coordination, and range of motion and train patients to perform activities of daily life. <i>Source: (1) American Physical Therapy Association, P.O. Box 37257, Washington, D.C. 20013. 224P00000X	Prosthetist	Active
<p>A health care professional who is specifically educated and trained to manage comprehensive prosthetic patient care for individuals who have sustained complete or partial limb loss or absence. Prosthetists assess specific patient needs, formulate an appropriate treatment plan, implement the treatment plan and provide follow-up care. <i>Source: American Board for Certification in Orthotics, Prosthetics, and Pedorthics, Inc. [7/1/2010: modified, 7/1/2013: modified]</i></p> <p><i>Additional Resources: American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc., www.abcop.org and Board of Certification/Accreditation, International, www.bocusa.org.</i></p>		
225B00000X	Pulmonary Function Technologist	Active
<p>An individual who is trained and qualified to perform pulmonary diagnostic tests. In the course of conducting these tests, the Pulmonary Function Technologist is able to setup, calibrate, maintain, and ensure the quality assurance of the pulmonary function testing equipment. In the laboratory, clinical or patient care setting the technologist instructs patients, elicits cooperation, performs procedures, monitors patient response, and evaluates patient performance. Tests results are calculated, compared with predicted normal ranges, and evaluated for reliability. The technologist collects clinical history data and evaluates the clinical implications of the test results.</p>		
225800000X	Recreation Therapist	Active
<p>A recreation therapist uses recreational activities for intervention in some physical, social or emotional behavior to bring about a desired change in that behavior and promote the growth and development of the patient. <i>Source: Joel A. DeLisa and Bruce M. Gans, Rehabilitation Medicine: Principles and Practice Second Edition, J.B. Lippincott Company, Philadelphia: 1993, p. 7</i></p>		
226000000X	Recreational Therapist Assistant	Active
<p>Recreational Therapist Assistants work in support of or assistant to Recreational Therapists treating patients with disabilities, injuries, and illnesses. Recreational Therapist Assistants work in a variety of settings providing treatments using recreational activities, including games, sports, and crafts. <i>Source: National Uniform Claim Committee, 2015 [1/1/2016: new]</i></p>		
225C00000X	Rehabilitation Counselor	Active
<p>An individual trained and educated in a systematic process of assisting persons with physical, mental, developmental, cognitive, and emotional disabilities to achieve their personal, career, and independent living goals assessment and appraisal, diagnosis and treatment planning, career (vocational) counseling, individual and group counseling interventions for adjustments to the medical and psychosocial impact of disability, case management, program evaluation and research, job analysis and placement counseling, and consultation on rehabilitation resources and technology. Certification generally requires a Master's degree with specialized courses in rehabilitation processes and technology. <i>Sources: Commission on Rehabilitation Counselor Certification and Rhea, Ott, and Shafritz, The Facts On File Dictionary of Health Care Management, New York: Facts On File Publications, 1988.</i></p>

225CX0006X	Orientation and Mobility Training Provider Orientation and Mobility (O&M) specialists teach children and adults who have visual impairments the specific orientation skills used to find one's way in the environment and the mobility skills needed to travel safely and efficiently at home, school, work, and in the community. Instruction is usually provided one-on-one and can include skills such as how to use a long cane, the operation of low vision devices and electronic travel aids when appropriate, how to orient oneself to new environments, navigate public transportation systems, how to cross streets safely, and traveling by using hearing, remaining vision, and other senses. In addition, O&M Specialists help children to develop fundamental skills such as fine and gross motor skills, concept development and problem solving skills. Adult clients can also benefit from an O&M specialist evaluating their current use of travel-related skills, discussing their future goals, and helping them select a program of instruction that will allow them to reach their greatest travel potential. <i>Source: San Francisco State University Orientation and Mobility Program web site http://online.sfsu.edu/~mobility/ [7/1/2006: new]</i>	Active
225400000X	Rehabilitation Practitioner A health care practitioner who trains or retrains individuals disabled by disease or injury to help them attain their maximum functional capacity.	Active
227800000X	Respiratory Therapist, Certified A Certified Respiratory Therapist (CRT) is an entry level therapist who has passed a standardized written examination administered by the National Board for Respiratory Care (NBRC). CRTs provide diagnostic testing, therapeutics, monitoring rehabilitation, and education to patients with disorders of the cardiopulmonary system. They provide these respiratory care services in all health care facilities and in the home. A CRT is a graduate of an associate degree program approved by the Commission on Accreditation of Allied Health Educational Programs (CAAHEP) and where applicable, is licensed by the state and is practicing within the scope of the license.	Active
2278C0205X	Critical Care Respiratory emergencies are commonplace in the treatment of critical care patients. Included in the assessment measurements conducted by the respiratory therapist in the critical care settings are arterial blood gas puncture and analysis, intrarterial monitoring, bedside measurements of lung mechanics, hemodynamic monitoring, and inspired and expired gas measurements. This is coupled with the initiation and management of mechanical ventilation patients.	Active
2278E0002X	Emergency Care The immediate availability of diagnostic and therapeutic cardiopulmonary services in the assessment and management of trauma victims, patients requiring airway management and others requiring emergency care.	Active

2278G1100X	General Care This level of care includes diagnostics testing, therapeutics, monitoring, rehabilitation of patients with disorders of the cardiopulmonary system, as well as, education of the patient and family in regard to those disorders.	Active
2278G0305X	Geriatric Care Care of older patients who have age and/or disease related decremental pulmonary changes. Diagnosis and treatment is very important for this group since chronic lung disease is the major cause of morbidity and mortality among them. Furthermore, as this segment of the population increases, life expectancy is being extended.	Active
2278H0200X	Home Care Home care fosters individual responsibility for self-management of chronic respiratory conditions. It includes individualized assessment based plans of care service developed to promote safe, proper, and sustained use of prescribed respiratory therapy medications, equipment, and techniques in the home.	Active
2278P3900X	Neonatal/Pediatrics The care and treatment of premature infants, newborns and children. This includes management of mechanical ventilation, assessment, diagnostics and generalized respiratory treatments.	Active
2278P3800X	Palliative/Hospice A coordinated plan of care to help dying patients and their families handle the burden of terminal care. Effective secretion management and relief of dyspnea are paramount in caring for patients with end-stage pulmonary disease.	Active
2278E1000X	Patient Education The focus of patient and family education activities is to promote knowledge of disease process, medical therapy, and self help. Respiratory therapists are uniquely qualified to provide this service in regard to cardiopulmonary diseases and injury.	Active
2278P4000X	Patient Transport Transport respiratory therapist provide patient assessment, initiation of treatment modalities and continued monitoring of patient status of the critically ill and injured patients with special attention to advanced airway and ventilator management. The transport respiratory therapist knowledge and experience with complex neonatal, pediatric and adult patient care issues provides them with an expertise to assist with any patient care issue in a variety of transport modes.	Active
2278P1004X	Pulmonary Diagnostics Included in the area of pulmonary diagnostics are the following; collection and analysis of physiological specimens, interpretation of physiological data, administration of tests of the cardiopulmonary system, and the conduct of both neurophysiological and sleep disorders studies.	Active

2278P1006X	Pulmonary Function Technologist An individual who is trained and qualified to perform pulmonary diagnostic tests. In the course of conducting these tests, the Pulmonary Function Technologist is able to setup, calibrate, maintain, and ensure the quality assurance of the pulmonary function testing equipment. In the laboratory, clinical or patient care setting the technologist instructs patients, elicits cooperation, performs procedures, monitors patient response, and evaluates patient performance. Tests results are calculated, compared with predicted normal ranges, and evaluated for reliability. The technologist collects clinical history data and evaluates the clinical implications of the test results.	Active
2278P1005X	Pulmonary Rehabilitation The respiratory therapist can assist the chronic pulmonary patient in returning to an optimal role in society by providing an effective program. It includes bronchopulmonary drainage, exercise therapy, and patient education.	Active
2278S1500X	SNF/Subacute Care Care of residents in a long-term care environment. Respiratory modalities delivered include those similar in the general care and critical care areas but provided to less critical patients.	Active

227900000X	Respiratory Therapist, Registered A Registered Respiratory Therapist (RRT) is an advanced therapist who has passed standardized written and clinical simulation examinations administered by the National Board for Respiratory Care (NBRC). In addition, to the certified therapist (CRT) entry level skills, RRTs have advanced education and training in patient assessment, in the development and modification of patient care plans, and in assuring the appropriate utilization of respiratory care resources. An RRT is a graduate of an associate or baccalaureate degree producing educational programs approved by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) and where applicable, is licensed by the state and is practicing within the scope of that license.	Active
2279C0205X	Critical Care Respiratory emergencies are commonplace in the treatment of critical care patients. Included in the assessment measurements conducted by the respiratory therapist in the critical care settings are arterial blood gas puncture and analysis, intrarterial monitoring, bedside measurements of lung mechanics, hemodynamic monitoring, and inspired and expired gas measurements. This is coupled with the initiation and management of mechanical ventilation patients.	Active

Speech, Language and Hearing Service Providers

A provider who renders services to improve communicative skills of people with language, speech and hearing impairments.

231H00000X	Audiologist	Active
	(1) A specialist in evaluation, habilitation and rehabilitation of those whose communication disorders center in whole or in part in hearing function. Audiologists are autonomous professionals who identify, assess, and manage disorders of the auditory, balance and other neural systems. Audiologists provide audiological (aural) rehabilitation to children and adults across the entire age span. Audiologists select, fit and dispense amplification systems such as hearing aids and related devices. (2) An audiologist is a person qualified by a master's degree in audiology, licensed by the state, where applicable, and practicing within the scope of that license. Audiologists evaluate and treat patients with impaired hearing. They plan, direct and conduct rehabilitative programs with audiotry substitutional devices (hearing aids) and other therapy. <i>Source: (1) American Speech-Language-Hearing Association, (1996, Spring) Scope of practice in Audiology, p. 2</i>

246Q00000X	Specialist/Technologist, Pathology	Active
	<p>(1) An individual educated and trained in clinical chemistry, microbiology or other biological sciences; and in gathering data on the blood, tissues, and fluids in the human body. Tests and procedures performed or supervised center on major areas of hematology, microbiology, immunohematology, immunology, clinical chemistry and urinalysis. Education and certification requires the equivalent of an associate degree and alternative combinations of accredited training and experience. (2) A specially trained individual who works under the direction of a pathologist, other physician, or scientist, and performs specialized chemical, microscopic, and bacteriological tests of human blood, tissue, and fluids. Also known as medical technologists, they perform and supervise tests and procedures in clinical chemistry, immunology, serology, bacteriology, hematology, parasitology, mycology, urinalysis, and blood banking. The work requires the correlation of test results with other data, interpretation of test findings, and exercise of independent judgment. The minimum educational requirement (for one of several certification programs in medical technology) is a baccalaureate degree with appropriate science course requirements, plus a twelve-month, structured, AMA approved medical technology program and an examination; or a baccalaureate degree with appropriate science course requirements and experience.</p>

Agencies

A non-facility provider that renders outpatient outreach services that are not provided at a specific location. The licensure or registration is assigned to the agency rather than to the individual practitioners as would be the case in a group practice.

251B00000X Case Management **Active**

An organization that is responsible for providing case management services. The agency provides services which assist an individual in gaining access to needed medical, social, educational, and/or other services. Case management services may be used to locate, coordinate, and monitor necessary appropriate services. It may be used to encourage the use of cost-effective medical care by referrals to appropriate providers and to discourage over utilization of costly services. Case management may also serve to provide necessary coordination of non-medical services such as vocational rehabilitation, education, employment, when the services provided enable the individual to function at the highest level.

Source: CMS State Medicaid Manual Section 4442.3 [7/1/2006: definition modified]

251S00000X Community/Behavioral Health **Active**

A private or public agency usually under local government jurisdiction, responsible for assuring the delivery of community based mental health, mental retardation, substance abuse and/or behavioral health services to individuals with those disabilities. Services may range from companion care, respite, transportation, community integration, crisis intervention and stabilization, supported employment, day support, prevocational services, residential support, therapeutic and supportive consultation, environmental modifications, intensive in-home therapy and day treatment, in addition to traditional mental health and behavioral treatment.

251C00000X Day Training, Developmentally Disabled Services **Active**

These agencies are authorized to provide day habilitation services to developmentally disabled individuals who live in their homes. The function of day habilitation is to assist an individual to acquire and maintain those life skills that enable the individual to cope more effectively with the demands of independent living. Also to raise the level of the individual's physical, mental, social, and vocational functioning.

252Y00000X Early Intervention Provider Agency **Active**

Early intervention services are an effective way to address the needs of infants and toddlers who have developmental delays or disabilities. The services are made available through a federal law known as the Individuals with Disabilities Education Act (IDEA). IDEA provides states and territories with specific requirements for providing early intervention services to infants and toddlers with special needs. In turn, each state and territory develops its own policies for carrying out IDEA and its requirements. Broadly speaking, early intervention services are special services for eligible infants and toddlers and their families. These services are designed to identify and meet children's needs in five developmental areas. These areas are: physical development, cognitive development, communication, social or emotional development, and adaptive development.

251X00000X	<p>Supports Brokerage</p> <p>A provider of service/function that assists participating individuals to make informed decisions about what will work best for them is consistent with their needs and reflects their individual circumstances. Serving as the agent of the individual, the service is available to assist in identifying immediate and long-term needs, developing options to meet those needs and accessing identified supports and services and may include assistance with recruiting, screening, hiring, and training in-home support providers. A family or person-centered planning approach is used. Supports Brokerage offers practical skills training to enable families and individuals to remain independent. Examples of skills training include providing information on recruiting and hiring personal care workers, managing personal care workers and providing information on effective communication and problem solving. The service/function provides sufficient information to assure that individuals understand the responsibilities involved with self-direction and assist in the development of an effective back-up and emergency plan. Plans may elect to fulfill the requirement of this service/function using a self-directed case manager or creating a distinct service. The Supports Brokerage documents the need for assistive services, planning for and documenting the use of excess funds and locating and maintaining services.</p> <p><i>Source: CMS Independence Plus Waiver template. Hospital Units

A distinct part of a general acute care hospital. The distinctness of a unit is determined by characteristics such as the following: the unit has admission and discharge records that are separately identified from those of the hospital; the hospital has policies specifying that necessary clinical information is transferred to the unit when a patient of the hospital is transferred to the unit; the hospital's utilization review plan includes separate standards for the type of care offered in the unit; the beds assigned to the unit are physically separate from beds not included in the unit; the unit is treated as a separate cost center for cost reporting, funding and apportionment purposes.

273100000X Epilepsy Unit **Active**

An Epilepsy Unit is a distinct unit of a hospital that provides services that may include observation, urgent care, diagnostic testing, treatment, and medication management for patients with seizure disorders.

Source: National Uniform Claim Committee [7/1/2007: new]

275N00000X Medicare Defined Swing Bed Unit **Active**

A unit of a hospital that has a Medicare provider agreement and has been granted approval from HCFA to provide post-hospital extended care services and be reimbursed as a swing-bed unit.

Source: Code of Federal Regulations #42, Section 482.66.

273R00000X Psychiatric Unit **Active**

In general, a distinct unit of a hospital that provides acute or long-term care to emotionally disturbed patients, including patients admitted for diagnosis and those admitted for treatment of psychiatric problems on the basis of physicians' orders and approved nursing care plans. Long-term care may include intensive supervision to the chronically mentally ill, mentally disordered or other mentally incompetent persons; (2) For Medicare, a distinct part of a general acute care hospital admitting only patients whose admission to the unit is required for active treatment, whose treatment is of an intensity that can be provided only in an inpatient hospital setting, and whose condition is described by a psychiatric principal diagnosis contained in the Third Edition of the American Psychiatric Association Diagnostic and Statistical Manual or in Chapter 5 (Mental Disorders) of the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM). The unit must furnish, through the use of qualified personnel, psychological services, social work services, psychiatric nursing, occupational therapy, and recreational therapy. The unit must maintain medical records that permit determination of the degree and intensity of treatment provided to individuals who are furnished services in the unit; the unit must meet special staff requirements in that the unit must have adequate numbers of qualified professional and supportive staff to evaluate inpatients, formulate written, individualized, comprehensive treatment plans, provide active treatment measures and engage in discharge planning.

Source: (1) AHA Annual Survey p. A10 1996 AHA Guide; (2) Code of Federal Regulations #42, Section 412.27.

273Y00000X Rehabilitation Unit **Active**

In general, a distinct unit of a general acute care hospital that provides care encompassing a comprehensive array of restoration services for the disabled and all support services necessary to help patients attain their maximum functional capacity.

Source: AHA Annual Survey p. A10 1996 AHA Guide.

For Medicare, a distinct part of a general acute care hospital providing inpatient rehabilitation services that meets the following requirements. Rehabilitation Units have in effect a preadmission screening procedure under which each prospective patient's condition and medical history are reviewed to determine whether the patient is likely to benefit significantly from an intensive inpatient program or assessment; ensure that the patients receive close medical supervision and furnish, through the use of qualified personnel, rehabilitation nursing, physical therapy and occupational therapy, plus, as needed, speech therapy, social services or psychological services and orthotic and prosthetic services; have a plan of treatment for each inpatient that is established, reviewed, and revised as needed by a physician in consultation with other professional personnel who provide services to the patient; use a coordinated multidisciplinary team approach in the rehabilitation of each inpatient, as documented by periodic clinical entries made in the patient's medical record to note the patient's status in relationship to goal attainment, and that team conferences are held at least every two weeks to determine the appropriateness of treatment; have a director of rehabilitation who provides services to the unit and its inpatients for at least 20 hours a week, is a doctor of medicine or osteopathy, is licensed under State law to practice medicine or surgery, and has had, after completing a one-year hospital internship at least two years of training or experience in the medical management of inpatients requiring rehabilitation services.

Source: *Code of Federal Regulations #42, Section 412.29.*

276400000X Rehabilitation, Substance Use Disorder Unit **Active**

A distinct part of a hospital that provides medically monitored, interdisciplinary addiction-focused treatment to patients/clients who have psychoactive substance use disorders (commonly referred to as alcohol and drug abuse or substance abuse.)

Source: *Department of Defense Regulation 6010.8-R, Chapter 6.*

Hospitals

A health care organization that has a governing body, an organized medical staff and professional staff and inpatient facilities and provides medical nursing and related services for ill and injured patients 24 hrs per day, seven days per week. For licensing purposes, each state has its own definition of hospital.

282J00000X	Religious Nonmedical Health Care Institution	Active
<p>Furnishes only nonmedical nursing items and services to patients who choose to rely solely upon a religious method of healing, and for whom the acceptance of medical services would be inconsistent with their religious beliefs. Furnishes nonmedical items and services exclusively through nonmedical nursing personnel who are experienced in caring for the physical needs of nonmedical patients. For example, caring for the physical needs such as assistance with activities of daily living; assistance in moving, positioning, and ambulation; nutritional needs; and comfort and support measures. Furnishes nonmedical items and services to inpatients on a 24-hour basis. Does not furnish, on the basis of religious beliefs, through its personnel or otherwise, medical items and services (including any medical screening, examination, diagnosis, prognosis, treatment, or the administration of drugs) for its patients. <i>Source: Centers for Medicare & Medicaid Services, http://www.cms.hhs.gov/CertificationandCompliance/19_RNHCI.aspx#TopOfPage [7/1/2006: new]</i></p>		

28430000X Special Hospital

Active

A designation by the AHA of a hospital whose primary function of the institution is to provide diagnostic and treatment services for patients who have specified medical conditions, both surgical and nonsurgical.

Source: AHA Guide, Registration section, p. A5.

Laboratories

A room or building equipped for scientific experimentation, research, testing, or clinical studies of materials, fluids, or tissues obtained from patients.

291U00000X Clinical Medical Laboratory **Active**

(1) A clinical laboratory is a facility for the biological, microbiological, serological, chemical, immunohematological, hematological, biophysical, cytological, pathological, or other examination of materials derived from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, human beings. These examinations also include procedures to determine, measure, or otherwise describe the presence or absence of various substances or organisms in the body. Facilities only collecting or preparing specimens (or both) or only serving as a mailing service and not performing testing are not considered clinical laboratories. (2) Any facility that examines materials from the human body for purposes of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of, the health of human beings. Typical divisions of a clinical laboratory include hematology, cytology, bacteriology, histology, biochemistry, medical toxicology, and serology.

292200000X Dental Laboratory **Active**

A commercial laboratory specializing in the construction of dental appliances that conform to a dentist's specifications including the construction of dentures (complete or partial), orthodontic appliances, bridgework, crowns, and inlays.

Source: Lexikon: Dictionary of Health Care Terms, Organizations and Acronyms for the Era of Reform, The Joint Commission on Accreditation of Healthcare Organizations, Oakbrook Terrace, Illinois: 1994, p. 1245.

291900000X Military Clinical Medical Laboratory **Active**

A Department of Defense (DoD) medical clinical reference laboratory not associated with a DoD Hospital or DoD Clinic. An example is the Armed Forces Institute of Pathology.

[1/1/2005: new]

293D00000X Physiological Laboratory, (Independent Physiological Lab) **Active**

A laboratory that operates independently of a hospital and physician's office to furnish physiological diagnostic services (e.g. EEG's , EKG's, scans, etc.). Facilities offering ONLY physiological services are not certified as independent laboratories. If an independent laboratory offers physiological services IN ADDITION to clinical laboratory services, they are surveyed only for compliance with the clinical laboratory regulations because there are no health and safety regulations for physiological services.

Managed Care Organizations

Definition to come...

302F00000X	Exclusive Provider Organization	Active
<p>(1) An EPO is a form of PPO, in which patients must visit a caregiver that is specified on its panel of providers (is a participating provider). If a visit to an outside(not participating) provider is made the EPO offers very limited or no coverage for the medical service; (2) While similar to a PPO in that an EPO allows patients to go outside the network for care, if they do so in an EPO, they are required to pay the entire cost of care. An EPO differs from an HMO in that EPO physicians do not receive capitation but instead are reimbursed only for actual services provided; (3) An organization identical to a preferred provider organization except that persons enrolled in the plan are eligible to receive benefits only when they use the services of the contracting providers. No benefits are available when non-contracting providers are used, except in certain emergency situations.</p> <p><i>Source: (1) Medical Interface: Managed Care A thru Z- Managed Care Terms published by Medicom International, Bronxville, New York Telephone (914) 337-5023, p. 15; (2) "Glossary of terms used in managed care" Developed by the Managed Care Assembly (MCA) of Medical Group Management Association (MGMA), MGM Journal, September/October 1995, p. 58; (3) Rhea, Ott, and Shafritz, The Facts On File Dictionary of Health Care Management, New York: Facts On File Publications, 1988.</i></p>		
302R00000X	Health Maintenance Organization	Active
<p>(1) A form of health insurance in which its members prepay a premium for the HMO's health services which generally include inpatient and ambulatory care. For the patient, an HMO means reduced out-of-pocket costs (i.e. no deductible), no paperwork (i.e. insurance forms), and only a small copayment for each office visit to cover the paperwork handled by the HMO; (2) A organization of health care personnel and facilities that provides a comprehensive range of health services to an enrolled population for a fixed sum of money paid in advance for a specified period of time. These health services include a wide variety of medical treatments and consults, inpatient and outpatient hospitalization, home health service, ambulance service, and sometimes dental and pharmacy services. The HMO may be organized as a group model, an individual practice association (IPA), a network model or a staff model.</p> <p><i>Source: (1) Medical Interface: Managed Care A thru Z- Managed Care Terms published by Medicom International, Bronxville, New York Telephone (914) 337-5023, p. 20; (2) "Glossary of terms used in managed care" Developed by the Managed Care Assembly (MCA) of Medical Group Management Association (MGMA), MGM Journal, September/October 1995, p. 58</i></p>		
305S00000X	Point of Service	Active
<p>This product may also be called an open-ended HMO and offers a transition product incorporating features of both HMOs and PPOs. Beneficiaries are enrolled in an HMO but have the option to go outside the networks for an additional cost.</p> <p><i>Source: "Glossary of terms used in managed care" Developed by the Managed Care Assembly (MCA) of Medical Group Management Association (MGMA), MGM Journal, September/October 1995, p. 62</i></p>		

305R00000X Preferred Provider Organization

Active

A group of physicians and/or hospitals who contract with an employer to provide services to their employees. In a PPO, the patient may go to the physician of his/her choice, even if that physician does not participate in the PPO, but the patient receives care at a lower benefit level.

Source: "Glossary of terms used in managed care" Developed by the Managed Care Assembly (MCA) of Medical Group Management Association (MGMA), MGM Journal, September/ October 1995, p. 62

Nursing and Custodial Care Facilities

Broad category identifying licensed facilities with inpatient beds specializing in nursing and custodial care.

311500000X Alzheimer Center /Dementia Center/Dementia Special Care Unit **Active**

A freestanding facility or special care unit of a long term care facility focusing on patient care of individuals diagnosed with dementia or Alzheimer's Disease or their related diseases. Six elements of the facility/unit set it apart from other (the rest of the) facilities(y):

Admission of residents with dementia (including those with Alzheimer's disease);
 Staff who are specially selected, trained, and supervised;
 Activities that are specifically designed for the cognitively impaired;
 A marketing of a special care unit in brochures;
 A high level of family involvement; and
 A physical environment designed to keep residents safe and segregated from other populations.

310400000X Assisted Living Facility **Active**

A facility providing supportive services to individuals who can function independently in most areas of activity, but need assistance and/or monitoring to assure safety and well being.

[7/1/2003: new]

3104A0630X Assisted Living, Behavioral Disturbances **Active**

A facility providing supportive services to individuals who can function independently in most areas of activity, but exhibit abnormal behavioral responses and habits and therefore need special guidance, assistance and/or monitoring to assure safety and well being. This type of facility requires a staff with special training in dealing with and redirecting negative, violent or destructive behaviors.

[7/1/2003: new]

3104A0625X Assisted Living, Mental Illness **Active**

A facility providing supportive services to individuals who can function independently in most areas of activity, but need special guidance, assistance and/or monitoring as the result of a psychiatric problem. This type of facility requires a staff with special training in mental health training and dealing with psychiatric emergencies.

[7/1/2003: new]

317400000X Christian Science Facility (skilled nursing services) **Inactive**

Inactive, use 282J00000X

[7/1/2009: marked inactive]

311Z00000X Custodial Care Facility **Active**

A facility providing care that serves to assist an individual in the activities of daily living, such as assistance in walking, getting in and out of bed, bathing, dressing, feeding, and using the toilet, preparation of special diets, and supervision of medication that usually can be self-administered. Custodial care essentially is personal care that does not require the continuing attention of trained medical or paramedical personnel.

Source: Paraphrased from Section 3159 A3 of the Medicare Intermediary Manual.

311ZA0620X	Adult Care Home	Active
	<p>A custodial care facility providing supportive and personal care services to disabled and/or elderly individuals who cannot function independently in most areas of activity and need assistance and monitoring to enable them to remain in a home like environment.</p> <p>[7/1/2003: new]</p>	
<hr/>		
315D00000X	Hospice, Inpatient	Active
	<p>A provider organization, or distinct part of the organization, which renders an interdisciplinary program providing palliative care, chiefly medical relief of pain and supporting services, which addresses the emotional, social, financial, and legal needs of terminally ill patients and their families where an institutional care environment is required for the patient.</p> <p>Source: <i>AHA Guide, American Hospital Association.</i></p>	
<hr/>		
315P00000X	Intermediate Care Facility, Mentally Retarded	Active
	<p>(1) A public institution for care of the mentally retarded or people with related conditions. (2) An institution giving active treatment to mentally retarded or developmentally disabled persons or persons with related conditions. The primary purpose of the institution is to provide health or rehabilitative services to such individuals.</p> <p>Sources: (1) <i>Lexikon: Dictionary of Health Care Terms, Organizations and Acronyms for the Era of Reform, Joint Commission on Accreditation of Healthcare Organizations, Oakbrook Terrace, IL: 1994, p. 403</i> (2) <i>Paraphrased from Code of Federal Regulations #42, Public Health, Section 440.150(c).</i></p>	
<hr/>		
310500000X	Intermediate Care, Mental Illness	Active
	<p>A nursing facility that provides an intermediate level of nursing care to individuals whose functional abilities are significantly compromise by mental illness.</p> <p>[7/1/2003: new]</p>	
<hr/>		
313M00000X	Nursing Facility/Intermediate Care Facility	Active
	<p>An institution (or a distinct part of an institution) which- (1) is primarily engaged in providing to residents- (A) skilled nursing care and related services for residents who require medical or nursing care, (B) rehabilitation services for the rehabilitation of injured, disabled, or sick persons, or, on a regular basis, health-related care and services to individuals who because of their mental or physical condition require care and services (above the level of room and board) which can be made available to them only through institutional facilities, and is not primarily for the care and treatment of mental diseases; (2) has in effect a transfer agreement with one or more hospitals.</p> <p>Source: <i>Paraphrased from Section 1919 (a) of the Social Security Act.</i></p>	

31400000X Skilled Nursing Facility**Active**

(1) A skilled nursing facility is a facility or distinct part of an institution whose primary function is to provide medical, continuous nursing, and other health and social services to patients who are not in an acute phase of illness requiring services in a hospital, but who require primary restorative or skilled nursing services on an inpatient basis above the level of intermediate or custodial care in order to reach a degree of body functioning to permit self care in essential daily living. It meets any licensing or certification standards et forth by the jurisdiction where it is located. A skilled nursing facility may be a freestanding facility or part of a hospital that has been certified by Medicare to admit patients requiring subacute care and rehabilitation; (2) Provides non-acute medical and skilled nursing care services, therapy and social services under the supervision of a licensed registered nurse on a 24-hour basis.

Source: (1) "Glossary of terms used in managed care" Developed by the Managed Care Assembly (MCA) of Medical Group Management Association (MGMA), MGM Journal, September/October 1995, p. 64; (2) AHA Guide, 1996 Annual Survey.

3140N1450X Nursing Care, Pediatric**Active**

A nursing care facility designed and staffed for the provision of nursing care and appropriate educational and habilitative/rehabilitative services to children with multiple, complex or profound disabilities that can not be cared for in a less restrictive environment.

[7/1/2003: new]

Other Service Providers

Providers not otherwise classified, who perform or administer services in or related to the delivery or research of health care services, disease, and restoration of health. A non-individual provider who is not represented in one of the identified categories but whose data may be needed for clinical, operational or administrative processes.

177F00000X Lodging **Active**

A public or privately owned facility providing overnight lodging to individuals traveling long distances or receiving prolonged outpatient medical services away from home.

174200000X Meals **Active**

A public or privately owned facility providing meals to individuals traveling long distances or receiving prolonged outpatient medical services away from home.

Source: SD DSS Non-Emergency Medical Transportation program Transportation Services [7/1/2010: new]

Residential Treatment Facilities

Live in facilities where patients or clients, who because of their physical, mental, or emotional condition, are not able to live independently, and who receive treatment appropriate to their particular needs in a less restrictive environment than an inpatient facility. For example, an RTC may provide educational training and therapy for children with emotional disturbances or continuing care and therapy for people with severe mental handicaps.

320800000X Community Based Residential Treatment Facility, Mental Illness Active

A home-like residential facility providing psychiatric treatment and psycho/social rehabilitative services to individuals diagnosed with mental illness.
[7/1/2003: new]

320900000X Community Based Residential Treatment Facility, Mental Retardation and/or Developmental Disabilities Active

A home-like residential facility providing habilitation, support and monitoring services to individuals diagnosed with mental retardation and/or developmental disabilities.
[7/1/2003: new]

323P00000X Psychiatric Residential Treatment Facility Active

A residential treatment facility (RTF) is a facility or distinct part of a facility that provides to children and adolescents, a total, twenty-four hour, therapeutically planned group living and learning situation where distinct and individualized psychotherapeutic interventions can take place. Residential treatment is a specific level of care to be differentiated from acute, intermediate, and long-term hospital care, when the least restrictive environment is maintained to allow for normalization of the patient's surroundings. The RTF must be both physically and programmatically distinct if it is a part or subunit of a larger treatment program. An RTF is organized and professionally staffed to provide residential treatment of mental disorders to children and adolescents who have sufficient intellectual potential to respond to active treatment (that is, for whom it can reasonably be assumed that treatment of the mental disorder will result in an improved ability to function outside the RTF) for whom outpatient treatment, partial hospitalization or protected and structured environment is medically or psychologically necessary

Source: Champus Policy manual, Volume II, p. 6010.47M dated 9/12/94. Revision: Definition title revised 7/1/03

322D00000X Residential Treatment Facility, Emotionally Disturbed Children Active

A provider facility or distinct part of the organization which renders an interdisciplinary program of mental health treatment to individuals under 21 years of age who have persistent dysfunction in major life areas. The dysfunction is of an extent and pervasiveness that requires a protected and highly structured therapeutic environment. These organizations, or distinct part of organizations, exclude those that provide acute psychiatric care, partial hospitalization, group living, therapeutic schooling, primary diagnosis substance abuse disorder treatment, or primary diagnosis mental retardation or developmental disability treatment.

32060000X	Residential Treatment Facility, Mental Retardation and/or Developmental Disabilities	Active
	A residential facility that provides habilitation services and other care and treatment to adults or children diagnosed with developmental disabilities and/or mental retardation and are not able to live independently. <i>[7/1/2003: new]</i>	
32070000X	Residential Treatment Facility, Physical Disabilities	Active
	A residential facility that provides habilitation services and other care and treatment to adults or children diagnosed with developmental disabilities and/or mental retardation and are not able to live independently. <i>[7/1/2003: new]</i>	
32450000X	Substance Abuse Disorder Rehabilitation Facility	Active
	A facility or distinct part of a facility that provides a 24 hr therapeutically planned living and rehabilitative intervention environment for the treatment of individuals with disorders in the abuse of drugs, alcohol, and other substances. <i>[7/1/2003: modified title, modified definition]</i>	
3245S0500X	Substance Abuse Treatment, Children	Active
	A facility or distinct part of a facility that provides a 24 hr therapeutically planned living and rehabilitative intervention environment for the treatment of children with disorders in the use of drugs, alcohol, and other substances. Medical and supportive counseling services and education services are included. <i>[7/1/2003: new]</i>	

Respite Care Facility

A facility with dorm rooms where individuals who are unable to care for themselves may stay on a short term basis overnight to allow relief to persons normally providing care to them.

385H00000X	Respite Care Definition to come.	Active
385HR2050X	Respite Care Camp A camping facility that provides specialized respite care to individuals requiring enhanced services to enable them to remain in the community, (e.g., those with developmental delays, mental retardation, mental/behavioral disorders). The staff must have training in working with the target populations and dealing with emergency situations which might be related to or exacerbate the individual's condition. <i>[7/1/2003: new]</i>	Active
385HR2055X	Respite Care, Mental Illness, Child A facility or distinct part of a facility that provides short term, residential care to children, diagnosed with mental illness, as respite for the regular caregivers. <i>[7/1/2003: new]</i>	Active
385HR2060X	Respite Care, Mental Retardation and/or Developmental Disabilities, Child A facility or distinct part of a facility that provides short term, residential care to children, diagnosed with mental retardation and/or developmental disabilities as respite for the regular caregivers. <i>[7/1/2003: new]</i>	Active
385HR2065X	Respite Care, Physical Disabilities, Child A facility or distinct part of a facility that provides short term, residential care to children, diagnosed with complex or profound disabilities as respite for the regular caregivers. <i>[7/1/2003: new]</i>	Active

Suppliers

Suppliers, pharmacies, and other health care providers who supply health care related products or medications and associated professional and administrative services.

331L00000X	Blood Bank	Active
	<p>An institution (organization or distinct part thereof) that performs, or is responsible for the performance of, the collection, processing, storage and/or issuance of human blood and blood components, intended for transfusion. The institution may also collect, process, and/or distribute human tissue, including bone marrow and peripheral blood progenitor cells, intended for transplantation.</p> <p><i>Source: American Association of Blood Banks, Standards for Blood Banks and Transfusion, 17th ed.</i></p>	
332100000X	Department of Veterans Affairs (VA) Pharmacy	Active
	<p>Department of Veterans Affairs (VA) Pharmacy means any place under VA jurisdiction where drugs are dispensed and Pharmaceutical Care is provided to enrolled Veterans, by licensed pharmacists. The Pharmacy is reviewed by JCAHO, utilizes the VA hospital's DEA number, and has a designated NCPDP number. VA facility pharmacies include Inpatient (Institutional), Outpatient, Consolidated Mail Outpatient Pharmacies (CMOPs), Research, Addiction Treatment Centers, Long Term Care and Community Based Outpatient Clinics Pharmacies. The VHA Pharmacy Benefits Management – Strategic Healthcare Group has oversight for professional and practice activities of VA Pharmacies. Each pharmacy is under the direct supervision of a U.S. or U.S. territory licensed pharmacist, and has staffing to meet its designated scope of service.</p> <p><i>Source: Pharmacy Benefits Management – Strategic Healthcare Group, Veterans Health Administration, Department of Veterans Affairs [1/1/2006: new]</i></p>	
332B00000X	Durable Medical Equipment & Medical Supplies	Active
	<p>A supplier of medical equipment such as respirators, wheelchairs, home dialysis systems, or monitoring systems, that are prescribed by a physician for a patient's use in the home and that are usable for an extended period of time.</p>	
332BC3200X	Customized Equipment	Active

	<p>Definition to come...</p>	

333300000X	Emergency Response System Companies	Active
	<p>A supplier of a personal emergency response system (PERS), which is an electronic device that enables a patient to receive emergency assistance when needed. The PERS is one of two different methodologies of notification: (1) where the patient summons emergency assistance themselves directly through the device or (2) emergency assistance is summoned through secure activation by the caretaker/guardian, which sends the device location to emergency responders. <i>Source: National Uniform Claim Committee, 2010 [7/1/2010: modified]</i></p>	
332G00000X	Eye Bank	Active
	<p>An eye bank procures and distributes eyes for transplant, education and research. To promote patient safety, donated eyes and donor medical histories are evaluated based on strict Eye Bank Association of America Medical Standards</p>	
332H00000X	Eyewear Supplier	Active
	<p>An organization that provides spectacles, contact lenses, and other vision enhancement devices prescribed by an optometrist or ophthalmologist.</p>	
332S00000X	Hearing Aid Equipment	Active
	<p>The manufacture and/or sale of electronic hearing aids, their component parts, and related products and services on a national basis.</p>	
332U00000X	Home Delivered Meals	Active
	<p>Home-delivered meals are those services or activities designed to prepare and deliver one or more meals a day to an individual's residence in order to prevent institutionalization, malnutrition, and feelings of isolation. Component services or activities may include the cost of personnel, equipment, and food; assessment of nutritional and dietary needs; nutritional education and counseling; socialization services; and information and referral. <i>Source: Code of Federal Regulations #45, Part 96, Appendix A, Uniform Definition of Services.</i></p>	
332800000X	Indian Health Service/Tribal/Urban Indian Health (I/T/U) Pharmacy	Active
	<p>An Indian Health Service/Tribal/Urban Indian Health (I/T/U) Pharmacy means a pharmacy operated by the Indian Health Service, an Indian tribe or tribal organization, or an urban Indian organization, all of which are defined in Section 4 of the Indian Health Care Improvement Act, 25 U.S.C. 1603. <i>Source: The Medicare Prescription Drug, Improvement and Modernization Act of 2003 [1/1/2006: new]</i></p>	
335G00000X	Medical Foods Supplier	Active
	<p>A supplier of special replacement foods for clients with errors of metabolism that prohibit them from eating a regular diet. Medical foods are lacking in the compounds which cause complications of the metabolic disorder, and are not generally available in grocery stores, health food stores, or pharmacies. <i>Source: The Children with Special Healthcare Needs (CSHCN) Services Program, a program of the Texas Department of State Health Services</i></p>	

332000000X	Military/U.S. Coast Guard Pharmacy	Active
	<p>A Department of Defense (DoD) or U.S. Coast Guard entity whose primary function is to store, prepare and dispense pharmaceuticals and other associated items to Uniformed Services beneficiaries. These pharmacies may be associated with a DoD or U.S. Coast Guard clinic, DoD Hospital or freestanding. Usually associated with outpatient services.</p> <p><i>Source: TRICARE Management Activity Uniform Business Office User's Guide [1/1/2005: new; 7/1/2006: modified title, modified definition]</i></p>	
<hr/>		
332900000X	Non-Pharmacy Dispensing Site	Active
	<p>A site other than a pharmacy that dispenses medicinal preparations under the supervision of a physician to patients for self-administration. (e.g. physician offices, ER Urgent Care Centers, Rural Health Facilities, etc.)</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC) [1/1/2006: new]</i></p>	
<hr/>		
335U00000X	Organ Procurement Organization	Active
	<p>A federally designated organization that works with hospital personnel in retrieval of organs for transplantation. The federal government designates an OPO's service area and the hospitals with which an OPO is to establish working relationships.</p>	
<hr/>		
333600000X	Pharmacy	Active
	<p>A facility used by pharmacists for the compounding and dispensing of medicinal preparations and other associated professional and administrative services. A pharmacy is a facility whose primary function is to store, prepare and legally dispense prescription drugs under the professional supervision of a licensed pharmacist. It meets any licensing or certification standards set forth by the jurisdiction where it is located.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC) [1/1/2006: added definition]</i></p>	
	3336C0002X	Active
	<p>Clinic Pharmacy</p> <p>A pharmacy in a clinic, emergency room or hospital (outpatient) that dispenses medications to patients for self-administration under the supervision of a pharmacist.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC) [1/1/2006: new]</i></p>	

3336C0003X	Community/Retail Pharmacy	Active
	<p>A pharmacy where pharmacists store, prepare, and dispense medicinal preparations and/or prescriptions for a local patient population in accordance with federal and state law; counsel patients and caregivers (sometimes independent of the dispensing process); administer vaccinations; and provide other professional services associated with pharmaceutical care such as health screenings, consultative services with other health care providers, collaborative practice, disease state management, and education classes.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC) [1/1/2006: new]</i></p>	
3336C0004X	Compounding Pharmacy	Active
	<p>A pharmacy that specializes in the preparation of components into a drug preparation as the result of a Practitioner's Prescription Drug Order or initiative based on the Practitioner/Patient/Pharmacist relationship in the course of professional practice. A compounding pharmacy utilizes specialized equipment and specially designed facilities necessary to meet the legal and quality requirements of its scope of compounding practice.</p> <p><i>Sources: NABP Model Practice Act, Appendix C - Good Compounding Practice, USP <795> and <797>, and Pharmacy Compounding Accreditation Board [7/1/2006: new]</i></p>	
3336H0001X	Home Infusion Therapy Pharmacy	Active
	<p>Pharmacy-based, decentralized patient care organization with expertise in USP 797-compliant sterile drug compounding that provides care to patients with acute or chronic conditions generally pertaining to parenteral administration of drugs, biologics and nutritional formulae administered through catheters and/or needles in home and alternate sites. Extensive professional pharmacy services, care coordination, infusion nursing services, supplies and equipment are provided to optimize efficacy and compliance.</p> <p><i>Source: National Home Infusion Association [1/1/2006: new]</i></p>	
3336I0012X	Institutional Pharmacy	Active
	<p>A pharmacy in a hospital (inpatient) or institution used by pharmacists for the compounding and delivery of medicinal preparations to be administered to the patient by nursing or other authorized personnel. Institutional Pharmacies also counsel patients and caregivers; administer vaccinations; and provide other professional services associated with pharmaceutical care such as health screenings, consultative services with other health care providers, collaborative practice, disease state management, and education classes.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC) [1/1/2006: new]</i></p>	

3336L0003X	Long Term Care Pharmacy	Active
	<p>A pharmacy that dispenses medicinal preparations delivered to patients residing within an intermediate or skilled nursing facility, including intermediate care facilities for mentally retarded, hospice, assisted living facilities, group homes, and other forms of congregate living arrangements.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC)</i> [1/1/2006: new]</p>	
3336M0002X	Mail Order Pharmacy	Active
	<p>A pharmacy where pharmacists compound or dispense prescriptions or other medications in accordance with federal and state law, using common carriers to deliver the medications to patient or their caregivers. Mail order pharmacies counsel patients and caregivers (sometimes independent of the dispensing process) through telephone or email contact and provide other professional services associated with pharmaceutical care appropriate to the setting. Mail order pharmacies are licensed as a Mail Order Pharmacy in the state where they are located and may also be licensed or registered as nonresident pharmacies in other states.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC)</i> [1/1/2006: new]</p>	
3336M0003X	Managed Care Organization Pharmacy	Active
	<p>A pharmacy owned by a managed care organization (MCO) used by pharmacists for the compounding and dispensing of medicinal preparations to that MCO's covered members only.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC)</i> [1/1/2006: new]</p>	
3336N0007X	Nuclear Pharmacy	Active
	<p>A pharmacy dedicated to the compounding and dispensing of radioactive materials for use in nuclear imaging and nuclear medical procedures.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC)</i> [1/1/2006: new]</p>	
3336S0011X	Specialty Pharmacy	Active
	<p>A pharmacy that dispenses generally low volume and high cost medicinal preparations to patients who are undergoing intensive therapies for illnesses that are generally chronic, complex and potentially life threatening. Often these therapies require specialized delivery and administration.</p> <p><i>Source: Developed by National Council for Prescription Drug Programs (NCPDP), National Home Infusion Association (NHIA), and Pharmacist Services Technical Advisory Coalition (PSTAC)</i> [1/1/2006: new]</p>	

335V00000X Portable X-ray and/or Other Portable Diagnostic Imaging Supplier **Active**

A supplier that provides one or more of the following portable services, including but not limited to, x-ray, electrocardiogram (EKG), long-term EKG (Holter Monitor), bone densitometry, sonography, and other imaging services in accordance with all state and federal requirements, under the general supervision of a qualified physician. All necessary resources are transported to the patient's location where the services are performed.

Source: National Uniform Claim Committee, 2015 [1/1/2016: title and definition modified]

335E00000X Prosthetic/Orthotic Supplier **Active**

An organization that provides prosthetic and orthotic care which may include, but is not limited to, patient evaluation, prosthesis or orthosis design, fabrication, fitting and modification to treat limb loss for purposes of restoring physiological function and/or cosmesis or to treat a neuromusculoskeletal disorder or acquired condition.
